Under the word years, find the year; above which is the Dominical letter for that year: then against the Months find the same letter, over which are placed the days of the Month, for every Sunday in the Month. In Leap year, for January and February, use the letter above the blank space before the year; for all the rest of the Months, use the Letter for the year.

To find out when it is Leap Year, divide the year by 4; if there is no remainder, it is Leap Year; and if any remainder it is 1, 2, or 3 years after Leap Year.

# Local Observations.

#### JANUARY.

This is one of the most delightful months in the year; its temperature is cool and refreshing; and extremely agreeable to those in the enjoyment of good health, but to rheumatic and gouty subjects is far from pleasant.

The days are cool, serene, and cleer; the mornings and evenings

damp and foggy.

The thermometer ranges in the Shade from 52 in the morning to 65 in

the afternoon.

The wind is Northerly, and seldom blows strong; but when it does and accompanied with rain, t(which sometimes happens in the course of the

month) the Cold is most disagreeable.

Vegetables, of all kind are in the highest state of perfection; the market abound with green peas, cautiflowers, cabbages, turnips, potatoes, yams, carrots, spinnage, greens, cucumbers, radishes, celery, intruces, young onions, old cole, kochoo, french beans, seem, brinjalls, red and white beet. &c &c.

The market produces beef. mutton, veal, lamb, pork, kid, poultry, &c.

of best and most superior kind

Game is to be had in great abundance—snipe, wild duck, teal, &c. &c. The fish market is well susplied at this season, with beckey. (the salmon of the East,) moonjee, rowe, cu lab, quoye, sowle, sellish, bhalah, eess; bonspattah, and many others of inferior description.

Fruit trees in general, begin to show their buds and blossoms this

month—mangoe, neach, pumpelnose, (shaddock), rose apples. &c.

The following fruits and vegetables, are procurable throughout the year. viz—plantains, sugar canes. cocounits, guavas, pine apples, papaws or napiahs, custard apples, jack, country almonds, tamarinds, emroh, barbuite, mint. sage, cives (gaudina,) parsley, onicas. &c.

The fruits in seasons are China or inges, loquats plantains, pineapples, sugar caue, country atmouds. limes, and tipparah, (a kind of gooseherry)

#### FEBRUARY.

The beginning of the present month is generally cool and comfortable, particularly if the Northerly wind prevails; the weather then becomes disagreeable, tiel a change of season takes place about the end of the month.

When the weather is variable, the wind blows principally from the N. W veering round occasionally to the N. E. E attended with clouds and drizzling rain; this continue is labout the 20th, when the southerly wind sets in. The weather now becomes mild and genial, especially to those who are subject to the gout and theumatism.

The days are sometimes hot, and the nights cool and chilly, with heavy

dews.

The Thermometer in the shade ranges on a medium, from 58 in the morning to 75 in the evening.

The measles, in children, are very prevalent during the whole of this

month.

Rheumatism and gout become less intolerable after the Southerly winds have set in., Warm clothing is rather troublesome to new comers, not so with old Indiana; the state of whose blood is from the debilitating influence of the climate, considerably under proof. Sometimes this month is rather showery, which protracts the cold season till the middle of the tellowing manch.

Meat and vegetables continue good and aburdant.

The fish market has the addition of the email break (herrings)

The additional vegetables are asparague quarkin and young cucum. bers: and fruits, custard apples, hulberries, bale and small water metans.

#### MARCH.

The weather, during the greater part of this month, being agreeably warm, its temperature is extremely favorable to old Indians;—thus, while the Thermometer plays at summer heat, re-treshed by a cool and favored Southerly breeze, the long established Anglo-indian feels his cold blood meandering through the torpid veius, which gives a sest to every vital power and animates his whole system.

The Thermometer ranges in the shade from 68 in the morning to 82 in

the afternoon.

The alternate changes of Jeat and cold render part of this month un-

pleasant, as the heat becomes at times rather oppressive.

Various operations of husbandir, generally commence this month, so soon as the ground is moistened by rain this however sometimes happens at the latter end of February, and then it is occasioned by an unusual quantity of rain.

The meat market continues good.

Fish to be nad in abundance, and the mirket has the addition of the

gootraly a small and well flavored hish.

Green peas and turnips disappear this month, sallad, cabbages, carrots and celery are on the decline, but asparagus and potatoes continue excellent; green mangoes and unripe tootee are to be had, also omrah, greens and water cresses.

Fruit is also plentiful—large water melous apport about the middle of the present month, and continue in perfection till the middle of June.

The prices of articles, in the bazar of Calcutta, considue (with trifling variations) the same all the year round. The best matton may be procured; at all seasons of the year, at one rupee the quarter or saddle; the best veal at one rupee and a half per quarter; sur oin of the best beef for 2 and 3 rupees, and so in proportion to its quality, down to one rupee, the surloin, edge bone, or round; fowls are from 2 to 12 for one rupee, according to their size; ducks from 3 to 8; geese from 8 annas to two rupees per pair; wheat is from one rupee to one rupee four annas per maund, according to the quality in the market; rice from three rupees to one rupee and a half per maund, according to its quality, and so with respect to other articles.

The North-westers with thunder and lightning, and rain, generally

commence about the termination of this mouth.

#### APRIL.

The beginning of this month is sometimes pleasant, particularly if the borth westers are frequent; but the latter part, as also the middle, is disagreeable in the extreme; it is one of the worst months in the year.

The Thermometer ranges in the shade from 80 in the morning to 92 in the afternoon, but when exposed to the sun, it rises to 110 and higher.

The wind blows from the Southward, and is very strong throughou the month; but when it is accompanied with hot winds from want of rain, it makes every exertion of the human system tiresome. fatiguing and oppressive. These parching winds are unfavorable to vegetation, and were it not for occasional supplies of rain, would prove disastrous.

The North-western are at times attended with dreadful storms of thunder and lightning, during which rain and hail fall in torrents: these storms sometimes occasion much and extensive damage--people and cattlars killed by the electric fluid, whilst other are struck down by the lightning and stunned for several hours. The Morthwesters continue at intervals till the beginning, and sometimes till the middle of May.

This is an unfavorable season for meat, which begins to be flabby and poor, the fit spungy and yellow; and very little good, of any de-

scription, is to be found in the marker

The fish market, this month, has the addition of the mangoe fish, so called from its animal visit into all the Bengal rivers, at this (the mangoe) reading to spawn, it appears as soon as the mangoe is formed on the tree, and disappears at the close of the season, that is about the middle of July. This fish perhaps, has the most agreeable flavor of any in the known world, and so sought after, (by natives as well as Europeans.) that atthornot to large as a middle sized whiting at the beginning of the mouth, they are sold trop 2 to 4 per rupee, and before the end of May, as they hecome plentiful, they are one rupee the score; and in June, two to three score for one rupee. The fish market has also the addition of the carp, mhagoor.

Cotatres, asparagus onions, curumbers and a few cabbage sprouts

are the only vegetables to be procured

Water melons and musk melons are in great parfection: -- there is not much fruit now to be had at market. Green mangoes for pickling, and corinda for tarts are in great abundance.

#### MAY.

The present is considered the worst month in the year, it being parching but and no rain.

The thermometer ranges in the shade, on a medium, from 85 in the morning to 98 and the afternoon; if exposed to the full influence of the

Sun beams, it will rise to 120 degrees, and sometimes higher

The weather this month is most oppressive, especially the latter half: the wind continues Southerly, and the heat is scarcely bearable.--Of all months in the year, the present is the most painful, particularly to those whose avocations compel them to be much out of doors. To be exposed to the Sun without a covering, is extremely dangerous at any hour, from 10 to 5 o'clack; it would be death to any constitution. except to natives. who are inured to the climate by birth and practice, and even they sometimes tall a sacrifice to the powerful influence of the Sun. The heat in the first half of the month is sometimes relieved by a few Northwesters accompanied by refreshing showers: vivid lightning and distant thunder at times attend the North-westers. In 1812, 13. and 14, the month of May was remarkably dry, and the heat scarcely supportable; in 1815, there were frequent and copious showers of rain; in 1816, from the commencement of the year, up to the beginning of July, there were not above three showers, and these were very slight, although the rainy season is always expected and generally does commence in June, between the 10th and 20th, 1817, was extremely irregular, --- the rains set in about the middle of February, and continued in light and heavy showers till the middle of September, from which period up to the 18th of October, the season was uncommonly oppressive ;--- the concluding shower fell from midnight on the 17th, to miduight on the 18th of the same month. In 1819 the rains set in unexpectedly and violently about the middle of May; the rain came down in torrents for three successive days and nights

"Grapes of the larges, s ze, peaches, pine apples, limes, rose apples, leeches, jumbrules, wampees together with water melons, musk melons,

pomegranates, custard apples. &c. &c. in season and in perfection.

The meat market is very indifferent, inferior to last month.

Fish continue good and abundant, the beckty excepted, which, from the difficulty of its reaching the market in a firm state, become scarce.

Mangoe fish in great perfection this month.

Asparagus, potat es, and cabbage sprouts, with indifferent turnips, sweet potatoes, cucumbers and ontons are nearly all the vegetables now in the maket. Pumpkins and other cucurbitaceous roots are procurable in the bazar.

#### JUNE.

The periodical rains set in about the middle of this month: had not the course of Divine Providence thus addained it the present and succeeding months would become intolerable from parching heat, and a period would be put to vegetation: but refreshing and cooling showers falling occasionally, and heavy rain sometimes, render the mean temperature of this and the three following months much less than might be expected from that of the preceding month of May.

The thermometer, the first half of this month rises frequently to 99, in the shade, at noon; from which time, that is, about the 15th, if the rains

commence, the heat of course subsides.

The weather throughout the wholf of this month, however, is pleasant or optressive, according to the quantity of rain which falls; if the weather, he dry, the heat is scarcely hears. He generally very close; not a breath of air from any quarter; but if the rains commence, as they are always expected to do, (in regular seasons) between the 16th and 20th of the month, the air is refreshing, and the weather not uncomfortable.

Meat, as must be expected, very indifferent. The fish market much the same as last month.

Mangoes and mangoe fish in great abundance, and in great perfection. The Maldah mangoes arrive in Calcutta about the middle or latter end of this mouth, and they are considered without exception to be the best that can be procured in Bengal.

Grapes, peaches, leeches, &c. disappear this month.

Custard apples, pine apples and guavas are in great perfection.

Asparagus and potatoes, onions and Indian corn, are the principal vegetables that remain.

JULY.

This month is attended with much rain; the winds are light and variable; the weather frequently gloomy, and sometimes stormy with heavy falls of rain; whilst at intervals it is fair, mild, and the temperature agreeable.

The thermometer ranges in the shade from 80 in the morning to 89

in the atternoon.

The showery weather of the present and preceding month is productive of the most beneficial effects to the grain.

Meat continues lean and poor.

The fish market continues good. The moonjee the rowe, the, cut'ah, the quoye, the sowle, the mhagoor, the chingree, the tangrah and the chunnah, are procurable all the year round. The hilsa (or sable) fish makes its appearance this month. The price of this fish is one rupee for two of the large size; in the course of next month, 4 to 8 may be purchased for a rupee, the lowest rat at which they are sold: this fish is delicious either boiled, baked, or roasted; but it is generally considered very unwholesome. The natives devour it in such quantities, as to occasion great mortality among them. This fish, on being cured with tamarinds, forms a good substitute for herrings.—It is then known by the appellation of the tamarind fis.

Mangoes and mangoe fish both disappear this month.

The vegetable market very indifferent --- asparagus is in perfection. but potatoes becoming poor and watery. Young lettuces cucumbers and sweet potatoes are now procreable; as also the cumranga and corinda.

Pine apples, custand apples and guavas continue in season.

afternoon.

Light and variable winds, and cloudy weather, with smart and light rain, prevail at the beginning of the month; the middle is sometimes fair, mild, cool and pleasant; the rymainder variable, attended at times, with strong winds and heavy rain.

astonishing rapidity

The meat and fish markets much the same as last month-

apples and guasas continue in perfection.

The vegetables procurable are sallad, asparagus, cucumber, brinjalls, muckum seem (a kind of french beass) radishes turnips, cabbage sprouts, and some indifferent potatoes. Indian corn; cucumbers, spinnage, and such like are to be had all the year round; int they are tasteless, except at this season, when they become firm, good, and very palatable. The avigato pear is sometimes procurable at this period, a most delicious relish, when lightly spread on toast andbutter, with a little salt and pepper.

#### SEPTEMBER.

The rains subside considerably during this month.

The wind continues light and variable, attended with occasional cloudy weather. The days are sometimes fair, mild, and bright,---and the temperature agreeable.

#### OCTOBER.

The first half of this month, in general yields a good supply of rain, and introduces the powerful influence of a second spring season upon all vegetating hodges: heat and moisture are in tull operation, and pro-

duce rapid regetation.

The rainy season breaks up generally between the 10th and 20th of this month; sometimes, however, it continues a little longer, but this is seldom thecase; the concluding showers are frequently heavy, continuing from 6 to 24 hours, incessantly; after which the weather becomes fair calm, and settled.

The thermometer ranges in the shade from 75 in the morning to 80 in

the afternoon

The winds are in general light and variable during the month, veering from South to N. W. thence to Nor.h and N. E.

The monsoon changes about the 21st of this month.---after which light Northerly breezes set in with occasional N.E. winds.

As soon as the weather sets in fair, it is the propitions season for

preparing the kitchen garden.

The meat market begin to revive, and the fish market to improve—the bekty becomes firm, and the other fish proportionably good, Snipes make their appearance.

Vegetables and fruit continue much the same as last month, till the latter end of present month, when, if the season is favorable both experience a considerable improvement. Oranges become largeaud better flavoured, and custard apples are in great perfection.

Young potatoes, sometimes, make their appearance this month, but they have very little flavour :---they are extremely small and watery. Pomegranates are procurable togethe, with kutbail.

#### CHRONOLOGICAL CYCLES.

Dominical Letters FE	Solar Cycle
Lunar Cycle, or Golden No 5	Roman Indiction1
Epact 14	Julian Period6,541

The Solar Cycle, or Cycle of the Sun, is a period of 28 years in which all the varieties of the Dominical Letters will have happened, and they will return in the same order as they did 28 years before. This Cycle commenced 9 years before the birth of Christ.

The Lunar Cycle, or Cycle of the Moon, commonly called the Golden Number (and sometimes the Metonic Cycle, from Meton, an Athenian who invented it about 432 years before the birth of Christ.) is a revolution of 19 years, in which time the conjunctions, oppositions, and other aspects of the Moon, are within an hour and a half of being the same as they were on the same days of the months 19 years before. The prime, or Golden Number, is the Number of years elapsed in this Cycle. At the birth of Christ, the Golden Number was 2.

The Roman Indiction, is a period of 15 years, used by the Romans for the times of taxing their Provinces.—This Cycle commenced 3 years before the birth of Christ.

The Julian period contains 7980 years, and arises by multiplying together 28, 19 and 15, being the Cycles of the Sun, Moon, and Indiction. This was also contrived as a period for Chronological matters, and, is assumed, as a correct and fixed rule in calculations, by all the Astronomers and Chronologers throughout the Christian World. This period is supposed to have commenced 710 years before the usual date of the creation of the World, or 4714 before the commencement of the Christian Era.

The Hijera commenced at the period of the flight of Mahomed, or 622 years after the birth of Christ; which, according to Solar time, makes the present year 1205-6, or 1243-44, of Lunar Time.

The letters for the first, second, and third years after every bissextile, are the three single letters placed under the double letters, in the same column with the bissextile they immediately follow. For example, as the Dominical Letters for 1600 were B.A. so the Dominical Letters for 1600 were B.A. so the Dominical Letters for 1602 F. and for 1603 E. So for 1796 the Dominical wall be. C.D.; consequently 1797, 1798 and 1799, must have A, G, and F: and the letter to: 1800 (which is to be accounted a common year) will be E; therefore 1801, 1802 and 1803, must have the subsequent letters D, C and E; and then 1804, being bissextile will come under the letters A G: and from thence every ourth year will be leape; ear to 1806 inclusive.

Gold and silver are also weighed by the Tale and Catty; 100 Tales are reckoned to weigh 120 oz. 16. dwts. troy, which make the tale equal to 579.84 grains.

The foregoing Weights are sometimes otherwise denominated by the natives; the Catty is called Gin; the Tale, Lyang; the

Mace, Tchen; the Candarine, Fwen; and the Cash, Lis.

Gold is purchased in ingots of a determined weight, which the English call Shoes of Gold; the largest weigh ten Tales, and the gold is reckoned 94 Touch, though it may be only 92 or 93.

The Chinese arithmetic is mechanical. To find the aggregate of numbers, a machine is in universal use with all descriptions of people. By this machine, which is called a swanpan, arithmetical operations are rendered palpable. It conists of a frame of wood, about an inch dee, and of various sizes, from 4 to 12 inches long. by 2 to 6 broad, divided into two compartments by a bar down the middle through this bar at right angles are inserted a number of parallel wires, and on each wire; in one compartment are five moveable balls, and in the other, two. These wires may be considered as the ascending and descending power of a numeration table, proceeding in a tenfold proportion, so that if a ball upon any of the wires in the larger compartment be placed against the middle bar, and called unity, or one; a ball on the next wire above it will represent ten; and one on the next, one hundred: so also, a ball on the wire next below that expressing unity, will be one-tenth; the next lower, one hundredth; and the balls on the corresponding wires in the smaller compartment will be five, fifty, five hundred, five-tenths, five hundredths, five thousandths; the value or power of each of these in the smaller division, being always five times as much as those in the larger. This system, from its apparent ease and simplicity, is much admired, but is subject to error; and a person commonly conversant with arithmetic, will make more progress, and be more correct, than the most skilful of the Chinese with the swanpan.

Measures — The long measure in use at Canton is cal and the covid or cobre: it is divided into ten punts, and is equal to 14.625 English inches. There are several measures answering to our foot.

Eng. Inches

The Foot of the Mathematical Tribunal is equ	ual to 13	125
The Builder's Foot, called Cougpu	12	7
The Tailors' and Tradesmen's Foot	13	33

The Li contains 180 fathoms each of ten feet of the last-mentioned length, which make the Li 1,897 English feet; and 192½ Lis measure a mean degree of the meridian, nearly: but the European Missionaries divide the degree into 200 Lis, each Li 1,826 English feet, which makes the degree 69,166 English miles.

#### EXAMPLES.

1st. What is the Interest of 50000 Rupees for 6 months and 3 days at 6 per cent. per annum.
50000 × 6 × 6 months 3 days=1830000

Answer, Rupees .. .. 1525.

2d. To reduce Current Rupees into Sicca Rupees, is best done by the Pen, as the multiplier would be too great to be of any use with the Table.

By the Pen. suppose 10000 Corrent Rupees to be reduced to Sicca Rupees, Multiply by 25 and divided by 29,—thus 10000 X 25

3d. To reduce Sicca Rupees to Current Rupees - Multiply by 116 and cut off the two right hand figures, the product will be the Answer.

Thus 1000 × 116=1160,00 or 1160 Current Rupees the Answer.
4th. To reduce Factory Weight to Bazar Weight—Multiply
by 1000, 1-11 and collect from the Table.—Thus suppose 1000 Factory Maunds were required to be reduced to Bazar Maunds, &c.

1000 × 1000, 1-11=1090909, Or thus by the Pen.

Answer Bazar Weight 909,090

5th. To reduce Bazar Mannds to Factory Weight-multiply by 1320 and collect from the Table. Thus suppose 1000 Bazar Maunds were required to be reduced to Factory Maunds, &c.

Answer Factory Maunds. 1100

6th. To reduce Bazar Maunds into Tons multiply by 44 and collect from the Table. Thus suppose 1000 Bazar Maunds were to be reduced to Tons, &c.

Opposite 4 is ... 00033,333

Answer Factory Mds. 3000 The Answer as before

It may be observed that in most instances the operation by the Pen, will be found much shorter than by any set of Tables whiever. But the object of Tables is not altogether the saving of time they are intended rather as Checks on Calculations by the Pen, into which errors may sometimes creep. One Table only, has been used here for all the above different operations, in order to save the trouble of references to different Tables, which would take up more time, and the Tables more snace. This has been effected by means of easy multipliers adopted for each subject. The Cyphers on the left hand of the figures in the Table are merely intended as guides to preserve at all times, the due number of places of figures to be taken out which must be always equal, including the Cyphers, to the number of places in the given product, with three places more to the right to answer for fractional party which is fully explained by the examples.

### TIME TABLE.

No. 1.—Shews the number of days from any given day in one month to the same day of any other month. It must be observed that in Leap Year, if the end of the month of February be included in the time, one day must be added. If it be desired to find the number of days from a given day in one month to a different day in and ther, the difference between the dates must be added to, or substracted from (as the case may be) the amount. For Example:—To find the number of days between the 5th of January and 12th of Nov.:—

From 5th of January to 5th of November - - 304 Days. From 5th to 12th of November -- - 7

If it be Leap Year, add - - - 1

Answer - - 312

No. 2.—Shews the decimal parts for each and all the days in the twelfth part of a year, consisting of 3654 days.

The following Remarks from Thornton's East Indian Calculator, an invaluable Work, from which most of the following Tables are extracted, will be the best preface we can offer to this part of our Appendix.

"The account subjoined of Money, Weights, and Measures is almost entirely new. This part of the work cannot be expected to possess equal pretensions to accuracy with the other. The impossibility of aitaining that object, under existing circumstances, prevents the Edutor from saving more than that it is more correct than preceding accounts, and as perfect as it could be made by a diligent examination of every authentic source of information upon the subject. He has derived great assistance (with permission of the Author) from the Universal (ambist f DR. KELLY, undoubtedly the best and safest authority. The communication he has had with that gentleman, convinces him that implicit remance cannot be placed upon existing accounts of the Weights and Measures of India; a defect which can only be remedied by the plan adopted, under the authority of Government, with respect to those of other parts of the world, the true proportions of which have been accurately determined by an examination of specimens sent from abroad of the Weights and Measures actnally used, accompanied with explanations from the proper authorities on the soot. Accordingly, the Court of Directors of the East India Company have issued orders to their servants in India, to transmit to England verified standards of the Weights and Measures in use throughout their territories, which, when received, are forwarded, for this important and desirable object, to Dr. Kelly, whose talent and qualifications render him the fittest person to be entrusted with the superintendence of this as of the former operation.

borious undertaking can be accomplished. The multiplicity of the different measures of quantity used throughout India, and the confusion which prevails, especially in the interior, with respect to their sandard, relative proportions. &c. have been frequently snoken of by travellers, and must greatly embarrass the undertaking. Dr. Heyne states that, in Mysore, almost every Cushah, or chief town of the district, has Weights and Measures differing widely from those in its neighbourhood. The scales commonly used, he says, are I kewise extremely rude and inaccurate, being merely flat baskets suspended

from a balanced pole, which is tied to a noose.

"It is remarkable that an attention to this subject is distinctly capation by the ancient legislator of the Hindoos:—" Let all weights and it agrees," says Nenu. "be well ascertained by the King, and once their months let nim re-examine them."—Institutes of Hindoo Law, Chap: VIII. tit. 403."

Omitting fractions, 335 Bengal Sicca Rupees are The equivalent exchange of 350 Madras Siccas, at which the Public Securities are transferrable; and consequently, 350 Madras Siccas (or 100 Star Pagodas, at 8s. each) being the equivalent of £40, 335 Bengal Siccas should give the same sum. But the interest Bills, payable in London, allow £40 for 320 Bengal Siccas only, at 28. 6d. each, (the Compay's rate of Exchange), which is in favour of the receiver of the Bills 37 & Bengal Siccas, or £4. 13s. 9d, sterling, per £100, against the Company.

Agam -335 Bengal Siccas, at 2s. 6d. each, give £41. 17s, 6d, and 350 Madra- Siccas, at 2s. 3d. each, (the Company's rate of Exchange), give £39. 7s. 6d.; the former sum being £1. 17s. 6d. above, and the latter 12s. 6d. below, the nominal equivalent of each, namely

£40.

Again: - The gold of the Guinea and Sovereign is of the same standard as that of the Madras Gold Rupee, viz. 22 carats fine; and the latter, weighing 180 grains of that gold, exchanges for 15 Silver Rupees of the same weight, which gives 12 grains of gold to each Rupee of Silver, equivalent to I grain per Silver Fanam of the late coinage, and 13 per Silver Anna of the new coinage of that Presidency. Now the Soverign, weighing clear & of the Madras Gold Rupre, which should fetch, according to the foregoing estimate, a fraction above 80 Rupees, fetches only 82 Rupees, according to the Company's valuation of 875 Madras Rupees per £100; a difference agaist the receiver upon this footing of not less than 132 Rupees upon every £100.

Gold is considered the standard metal, and there is no alteration either in weight or fineness from former comages: the Sovereign, or 20s. piece, being 20-21 parts of the weight and value of a Guinea, and theother pieces in the same proportion. - The silver coms are also of the old standard fines ness, of 11 oz. 2 dwt of pure silver to 18 dwt. of alloy; and 1 lb. troy of thus standard is now comed into 66 shillings, instead of 62 shillings, as was formerly the case.

#### CALCUTTA IN BENGAL.

COINS.—Accounts are kept here in Sicca Rupees, with their subdivisions, Annas and Pie; 12 Pie make I Anna; 16 Annas I Rupees and 16 Rupees I Gold Mohur. To this currency must all the re; specie he converted, before any sum can be regularly entered into a inerchant's book. The Company keep their accounts in Sicca Rupees which hear a Batta of 16 per Cent. against the Current.

The Coms current are Gold Mohurs, with their subdivisional halves and quarters; Sicca Rupees, halves and quarters; Annas, Pice,

(equal to 3 pie) and half Pice. The two last are of copper.

In 1766 the Bengal Gold Mohur weighed 179 66 grains, was of the fineness of 20 Carats, and passed for 14 Silver Rupees. The gold was here overvalued, for it passed in proportion to silver, as 169 45 to 1. In 1769 it was ordered that the Bengal Gold Mohur should weigh 190.773 grains, and in this coinage gold was valued to silver nearly as 14 8 to 1; and, by Regulation 35, Anno 1793, it was directed that the nineteen Sun Gold Mohur should weigh 190.894 grains, and contain 4 of a grain in 100 of alloy, and that it should pass for 16 nineteen Sun Sicka Rupees, Here gold is valued in proportion to silver as 14 85 to 1.

Gold Mohurs are coined only at the mint of Calcutta; at the sn-hordinate mints of Benares and Furruckahad, silver alone is coined. The fineness of both metals is the same as English standard gold, 1 12 The following statement shews the present weight, fineness, and sterling value of the Coins, reckoning the value of gold at £3, 17s, 102d.

per standard ounce; and silver at 5s. 2d.

By Regulation, 1819, the coinage of the Benares Rupee is discontinued; and the Furruckabad Rupee made the legal coinage of Benares.

It will be observed that the alloy has been increased; a regular tion which took place in 1819, whereby much expence is spared in refining. The charge for coining and for refining is the same at all the mints, for silver; namely, 2 per cent, if the bullion be of the standard fineness; but where it differs, a proportion charge of from ½ to ½ per cent, is made for refining.

See also the Assay Report, 1821-Bombay.

The standard of the Bengal money has ever been silver. Gold is occasionally comed, but the great bulk of the currency is silver. The most common silver common is the Rupee of 1 Sicca, or 10 Massa weight.

These Rupees were formerly called Sicca Rupees only during the year after their coinage, when the batta they bore on Current Rupees was 16 per cent; the second this was reduced to 13, and the third and following years the batta was 11 per cent.; they were then called

Sonaut or Sunat Rupees But with a view to abolish this distinction, all the Rupees coined of late years by the East India Company, have been dated the nineteenth Sun, that is the 19th year of the Mogul's reign; and by Regulation 35, Anno 1793, it was ordered that the nineteen Sun Sicca Rupees should be received as the legal coin of

Bengal, Bahar, and Orixs.

There are various other kinds of Rupees to be met with in Bengal, whose fineness and weight are different, though their denominations are the same. From this, and from the natives frequently punching holes in the Rupees, and filling up the vacancy with base metal, and their wilfully diminishing the weight of the coin after coming from the mint, the currencies of Rupees from the different provinces are of different values. This defect has introduced a custom of employing shroffs or money-changers, whose business is to set a value upon these different currencies, according to every circumstence, either in their favour, or their prejudice. When a sum of Rupees is brought to one of these shroffs, he examines them piece by piece, and arranges them according to their fineness; then by their weight; he then allows for the different legal battas upon Siccas and Sounats; and this done, he values in gross by the Rupees current what the whole are worth; so that the Rupee current is the only thing fixed, by which coin is valued.

A Current Rupee is reckoned at 2s. and a Sicca Rupee of ac-

count commonly at 2s. 6d.

A Lac of Rupees is 1.00,000; and a Crore, 100 Lacs, or 1.00,00.000 Rupees; and in accounts, sums are distinguished into Crores, Lacs, and single Rupees, by marks or divisions, as in the aforegoing examples.

Cowries, small white glossy shells, are made use of for small pay

ments in the Bazar, and are generally thus reckoned:

4 Cowries
20 Gundas
4 Puns ... equal to 
1 Pun
1 Anna
1 Cahun, which is about 4 of a Rupee

But they rise and fall according to the demand there is for them, and the quantity in the Market.

Coins .- According to the old monetary system, accounts were kept at this Presidency in Star Pagodas Fanams, and Cash Pagoda weighed 52.56 grains troy, and was commonly valued at It was divided into 45 Fanams, each Fanam containing 80 This was the proportion observed by Government, the Bank, and Agency Houses; but in the shops and bazar exchange, the number of Fanams to the Pagoda fluctuated according to circumstances, from 42 to 46 Fanans.

The Gold Coins were the single and double Pagodas; the Silver Coins were the single, double, and 5 Fanam pieces; the oneeighth, quarter, half, 1 and 2 Rupees; and quarter and half Pagodas; the Copper Coins consisted of 1, 5, 10. 20, and 40 Cashpieces.

According to the new currency, fixed by proclamation, dated Tort St. George, 7th January, 1813, the Silver Rupee constitutes the standard coin of this Presidency. The public accounts are accordingly converted from the Star Pagoda (the coinage of which is discontinued) into the Madras Rupee, at the exchange of 350 Rupees per 100 Star Pagodos. All Government transactions are now concluded in Rupees.

# Remarks on the Coins of Bombay.

SILVER.—The old Bombay Rupee is the same as was coined at Surat under the Mogul Government. It weighed 178.314 grains, and contained 1.24 per Cent. of alloy. By an ancient agreement with the Nabob of Surat, the Rupee of both Governments was to circulate through both at an equal value; while they mutually pledged themselves to keep up the Coin to its exact standard of weight and fineness. The Nabob, however, did not keep to this agreement; for his Rupees were found soon afterwards to centain, instead of 1.24 per Cent. of alloy, no less than 10 12, and even 15 per Cent. The consequence of this was, that all the Bombay Rupees were carried to Surat to be recoined. This unit was entired by stopped in its silver coinage for more than twenty years, and the circulation of silver was occupied by the Surat Repce.

In this situation of things the merchauts could not afford to coin their bullion here, and therefore Bombay was long without a silver comage of its own; when Government in 1800 ordered the Surat Rupee to be struck in this mint, and since that time the Rupee has been kept at an equal value in both mints. In both the Silver Rupee weighs 179 grains, and contains 7 97 per Cent. of alloy.

Gold.—In the year 1774 the Gold Mohur was made of the same weight as the Silver Rupee. It was ordered to be of the fineness of a Venetian, and to pass for 15 Silver Rupees. In this c inage, therefore, 14.9 grains of silver represented one gran of gold; for such is the proportion between the quantity of gold in this Gold Mohur, and the silver in 15 old Bombay Rupees. When the Surat silver currency had occupied the circulation, this proportion between gold and silver was quite destroyed; so that gold coined according to the regulation of 1774, was now exchanged for no more than thirteen times its weight in silver, and often for much less

In order to remedy this, and to bring back the Coins of gold and silver to nearly their ancient proportions, and their relative value in the market, it was ordered in 1800, that the Gold Mohur should be of the weight as the Silver Rupee, that it should contain the same quantity of alloy, and that it should pass for 15 Rupees.

WEIGHTS.—The English weights being in common use here, and at all the other Presidencies, the following account of their relative proportions may be found useful.

The two principal weights established in Great Britain are the avoirdupois and troy weights; the last is again divided into diamond and money weights; the grain is understood to be a grain of wheat, gathered in the middle of the ear.

Silver is commonly sold from 96 to 100 single pice per tola but computation in money are made by fuddeas, or double pice. The tola equals in weight the silver rupee.

The Bombay great weights are Pice, Seers, Maunds, and Candies, thus divided:—

They are usually strung a hundred in a string; but they rise and fall according to the quantity in the market, varying from 750 to 1000 Cash for a Tale. Their chief use is in making small payments amongst the lower classes of the

For the purpose of cutting the silver, they have a pair of sci-sors; and some are so dexterous, that they will cut the quantity required, without having occasion to cut a second time. All dollars which pass through the Hong Merchants' hands bear their stamp, or chop; so that by frequent exchanges, the dollars become soon mutilaten, and are then cut up for small change, or melted into ingots. All duties are paid in sycee or pure silver.

In the East India Company's accounts the Talo is reckoned at 6s. 8d. sterling; but its intrinsic value is according to the price paid

presented be dated in England) and that the Invoice is a faithful copy of the original English Invoice.

Goods cannot be passed on weight as per Invoice: for excep-

tions see oals, Chalk, Chanks, Flints.

Invoices signed by the Master of a vessel, even if he be Supercargo also, are not admissible. Affidavits to such documents are not received, because the Regulations do not authorize that mode of verification for such cases. The original Bills of Venders, if expressed in monies and weights known at the Office, and in a language understood here, are admissible. It is too much to expect of the Collector or of his Officers, to examine the datails of any person's Books or Papers to establish a fact, of which, after all, those Books afford no satisfactory, or conclusive proof.

Accounts Current, or Letters of Advice, are not admissible as

Invoices.

With respect to the trade with Malayan port to the Eastward, the Collector will admit Invoices signed by Masters or by Supercargoes of vessels;—after having satisfied himself, by examining any other available Invoices of about the same date, for the same kind of Goods,—and by consulting the Appraiser and others,—that the prices stated in them do show the true prime cost of the articles, at the date of purchase, at the places where they were shipped.

If original Invoices, or Bills, for Goods, be not presented to the Collector,—or if he see cause to suspect that the Invoices or Bills produced, do not show the true prime cost of the Goods, (by which is to be understood, their prime cost in the country of which they may be the produce or manufacture)—in either case the duty will be settled on the Calcutta price of such Goods at the time of

their importation.

The want of signature to a paper presented as an Invoice, of Bill, invalidates it as such:—still it will be admitted, provided the prices exhibited in it be not below those set forth in full, fair, duly signed original Invoices or Bills—for the same kind of articles, shipped at the same port, at or near the same period of time; and provided there be no ground for idoubting that the unsigned document was

bona fide, drawn out the place whence it purports to come.

Even though the unsigned document should shew prices lower than those of the same kind of articles, shipped at the same port,—at or near the same period of time, still, if the party who presents the the said unsigned document shall make affidavit that it is, bond fide, an original document, received from the seller of the Goods specified in it and shall also present a formal Price Current, shewing that the price of the Goods in question, at the place whence they purport to come, as set for h in the unsigned document produced as an Invorce or Bill, is not below the lowest price of that description of Goods as exhibited in the said Price Current, then the unsigned document will be admitted. But Affidavit as to the originality of such document, will not enritle it to be admitted at the Custom House, without the additional proof of correctness of price by production of formal Price Current. American Invoices. If Invoices from the United States of America be drawn out in Dollars, they are invariably considered to be Spanish Dollar. It drawn out in any other Coin or Money, a special reference will be made to the Board of Customs.

monetary and in other systems applicable to commerce in Germany, the Low Countries; and Holland, we have no correct information as to the comparative relations of their Monies or Weights with those of other countries. Consequently, Invoices drawn out in those Monies or Weights are not admitted. Goods for which such Invoices may be presented must be appraised at Calcutta marked value, and weighed if they be of sorts which are weighed here.

English or other weight is not known here under any authority. But, till otherwise settled, the Quintal, as per Invoice from that quarter, is to be considered as equal to 101 155 lbs. Avoirdupous Weight.

(Order of Board of Customs, dated 29th May, 1824.)

Leghorn Invoices. Our knowledge of the relative value of the Standards of Weight in use at Leghorn is imperfect. Invoices therefore, shewing the value of Goods according to any of the weights of that country, are not admitted. The Goods are appraised at a loute Market value, and weighted if of kinds which are weighted here.\*

Exchange. Mauritius and Agio. When Invoices from thence are expressed in France of Livres, the amount is to be converted into Bengal Money, without Agio, at the exchange of Twenty-four

Francs, of Forty-eight Livres, to Ten Sicca Rapees.

Invoices from thence expressed in Plastres, the amount is converted into Bengal Money thus; to be first brought into Spanish Dollars by allowing an 'Agio of '35 per cent; the result covertible into Sieca Rupees at Two and a quarter per Spanish Dollar. 'Paper Dollars the same as Piastres.

If Invoices be expressed in Dollars, they are considered to be Spanish Dollars, (unless satisfactorily explained otherwise) conver-

tible as above.

Exchange and Agio Bourhon. 'If Invoices be drawn out in Frances of Livres, they are after deducting Agio at 25 per cent. converted into Bengal Money, by estimating Twenty-four of either as equal to Ten Sicca Rupees.

Af Invoices be drawn out in Piastres or Dollars, they are turned into Bengal Money. without Agio, at Two and a quarter Sicea Ru-

pees per Dollar or Piastre.

When Invoices from either Island shall, in the detailed particulars of value, state one description of money, another kind in the sum total, the aggregate value is to be brought into that sort of money which the detailed particulars are given; and accordingly as the same may be Francs, Livres, Plastres, or Dollars, the Rules in respect of the grant, or not, of Agio, and of the conversion into Hengal Money, are to be applied as above explained.

Upon an application for Goods which are free by Regulation, -or because declared, as above, to be bond fide for the use of His Majesty's Naval Service in India, the next order will be "Pass." The Tide Waiters will not detain any such Passes, but, after seeing that all is correct, will write upon them, " Passed on such a

date" and allow the applications to go on with the Goods.

In order that no obstacles may be thrown in the way of His Majesty's Service, which is sometimes emergent, the Contractors may, after having put applications through the above forms, dispatch Goods to His Maj sty's Ships direct from Fort Gloster, when they are such as are prepared by themselves at that place, without first bringing them to the Calcutta, Custom House Wharf.

All Applications so passed shall be returned to the Castom House after the Goods, covered by them, have been received on board. His Majesty's Ships,—and the enus of returning them shall rest with the Contractors, when so returned, they shall bear upon the back of

of the packages detailed in any such applications have been received into His Majesty's Ship, the Contractors shall nevertheless pay duty on the specified contents of any packages (if liable to duty) not acknowledged to have been received on board; unless they shall bring such packages to the Costom House Wharf and reland them in the prescribed forms for relanding Goods, whether they have been passed

from that Wharf, or from Fort Gloster.

When applications are so returned to Office, the Contractors will reclaim their deposits for dutiable Goods, and settle the duty. The Export Supervisor will note on them the date of their return and give them Numbers, and he will then fill up the Columns in the Registers which had before been left blank. The transaction being thus completed, the Registers and Chellauns are to be sent up to the Board of Customs with the other Audit Papers for that week.

The Treasurer will enter all duty received on Goods or Articles supplied to His Majesty's Ships, under a separate head in his Daily Account, viz "Export Duty on Goods to His Majesty's Ships' and the Export Supervisor will deliver to the Collector a separate Check

Ticket for all such Duty.

Masters and Servants.—Masters, or Owners of Goods, are held responsible for all improver acts of those whom they employ to transact their business. At the 'ustom House, the irregularity committed, or attempted, is the only point considered.

The same Rule is applicable to Goods or Packages for exportation. Exceptions are provided for in the following Notifications.

But no article claiming Drabwback on Export by Foreign

Ships, - or by British Ships bound elsewhere than to Ports in the United Kingdom, shall be allowed to be Exported except from the Custom House Wharf.

It is to be clearly understood that this modification of existing Regulations is to be considered only as an indulgent relaxation of the strict letter of the Law, and hable to be revoked without any formal legislative enactment, if it should be abused, or if circumstances should arise to render its continuation unnecessary.

Calculta, General Post Office, July 25, 1825. Post Master General.

#### WEIGHT OF LETTERS.

It having been brought to the notice of Government, by the representation of the Post Master General, through the Board of Revenue, that much inconvenience arises from the prevailing practice of Public Officers inadvertently transmitting to Post Offices Letter Packets and Parcels, greatly exceeding the prescribed Weight (of 25 Sa Wt.) which are of consequence made over for transmission by Banghee thereby incurring delay and probable injury, that might otherwise in a great measure be avoided; the Governor General in Council is pleased to direct as follows:

1st. That the strictest attention be paid in every Department, throughout the Service, to the making up of Parcels, not to exceed

the prescribed limitation of Weight.

2dly. That when two or more Parcels of such description are delivered at a Post Office, containing Papers connected one with the other, it will be at the option of the Deputy Post Master to forward them to the Presidency, either by the same Mail if circumstances permit or separately by two or more successive Mails, in order that Mails may not be surcharged and their contents rendered insecure, especially in the Rainy Season.

Compact form they are susceptible of and altho' there is often an unnecessary expenditure of the Hon'ble Company's Stationery within; the contingent envelope of Letters, and Accounts of importance, is frequently of flimsy Country paper, of the worst kind, forming an Authorities are therefore hereby enjoined to require of their Executive Officer unremitting attention to these defects, and to the observance of such precautions, as will prevent, for the future, the Dawks being unnecessarily loaded, to the interruption of their progress, and to the encrease of very serious inconvenience, as well as unmerited responsibility to the Post Office Department.

By Command of His Excellency the Most Noble the Governor

General in Council,

COLIN SHAKESPEAR.

#### OVERLAND DESPATCH.

Letters are transmitted to England, via Bagdad, Smyrna, and Malta, under the following regulations:

1. The letters are not to exceed in length, 4 inches, in breadth 2 inches. They must not be sealed with wax, and must not be of

greater weight than one sicca rupee

2. No letters received at the post office, for overland despatch, but such as are accompanied by a note, specifying the writer, and with the writer's name signed under the address; and they must be countersigned by the post master general, previously to being deposited in the packet, a a warrant of permission.

3. Postage is paid on the delivery of such letters, in the office, at the following rates, viz — Ten sicca rupees for a single letter, weighing quarter of a sicca rupee, and under. Fifteen sicca rupees, weighing from quarter to had a sicca rupee. Twenty sicca rupees,

weighing from half to one sicca rupee.

Letters for Bushire, Bussorah, Aleppo, Smyrna, Constantinople, and Malta, are received and despatched by the above mode of conveyance. Those for Bushire and Bussorah pay at the rate of letters from Calcutta to Bombay, with ship postage. Those from Lagdad, Aleppo, and Smyrna, for each single letter sicca rupees 4, and progressively as above to 8 rupees. Those for Constantinople and Malta, 6 sicca rupees for each single letter, progressively to 12 sicca rupees.

5 On letters which are sent from the provincial stations, for the overland packets, the regular inland postage is charged in addition,

to the above rates

three in each year, and the undermentioned periods are fixed for their despatch from 1 ombay, viz. On the 5th February, on the 5th May, and on the 5th November; and further, in order that letters from Bengal may arrive at Bombay in good time to profit by this mode of conveyance, overland packets are made up in the general post office in Calcutta, and forwarded to that presidence on the following days, viz. The 15th January, the 15th April, and the 10th October.

As the Regulations of this office regarding Overland Letters, published under date the 24th May, 1813, were framed at a time when their transmission could not be effected by a less circuitous route than that of Smyrna and Malta, and the late happy events in Europe have apparently removed the obstacles which before prevented a more direct correspondence from being satisfactorily maintained between the distant parts of that Continent and Great Britain with

India;—The Post Master General considers it may be useful to the Public to intimate that he is not aware of any objection to the dispatch of Letters, under the principal provisions of the abovementioned Regulations by the way of Constantinople and Vienna. And that for this purpose, it appears to him to be only necessary, that such persons who wish their Overland Letters from London, or any place in England to be so forwarded, should clearly write immediately over the addresses on them, these words, namely. 'Via Cons antinople and Vienna,'

Letters with this superscription will be despatched accordingly:—
and it will be understood here, that those which do not bear it are
intended to be sent, as heretofore, by the routes of Smyrna and Malta.

### RULES OBSERVED AT THE

# CALCUTTA SEA CUSTOM HOUSE.

Goods wholly, or partially, from payment of duty on importation here, must be presented at this Office together with the Import Application: if presented at any time subsequent, they are of no avail and no refund can be made of duty paid. See Government Notification of 10th September 1819 in the Gizette of 23d of that month.

Certificates for Goods exported from hence cannot be granted if such Goods be not duly entered in Export Manifest: the production

of Bill of Lading, or of other document, is of no avail.

Drawbacks - None can be allowed, in any case, unless "Drawback required," or like words, have been written on the Export Application at the time of first presenting it in this Office, or on the Wharf.

None can be allowed on any Goods not duly entered in the Export Manifest, nor on any Goods passed after the issue of, Port Clearance.

If they be claimed on Goods which were originally imported by Sea,—the No. and Date of the Import Application must be given upon the face of the Export Application when first presented at this Office, together with specification of the number of Packages to be exported.—the Nos. and Marks which were upon them when imported, as well as the Nos. and Marks put upon them for exportation.—the contents and value of each when imported,—and the total value. Without these particulars no Drawback can be given.

No information whatever, with a view to enable individuals to establish claims to Drawback, or to Free Export, can be furnished from the Office books: all persons claimed Drawback must be pre-

pared with their own proofs.

If Drawback be claimed on Goods said to be protected by Rowannahs, the Nos. Dates, and Particulars of those documents must be detailed on the face of the Export Application when first presented at this Office.

Sums of Drawback cannot be paid to any one except to the owner or exporter of the Goods in question, nuless under a Power of Attorney,—or unless such owner or exporter shall have given written authority, signed by him in the presence of the Drawback supervisor, to some other person, to receive Drawback on his account Individuals frequently employ Sirkars, or others, to transact their Custom House business for them,—which latter sign their own names to Applications,—usually as "for A. B" who is the real owner or exporter,— and who, being about to quit Calcutta, leaves in the handa

of such Sirkars, or other, a written request, addressed to the Collector, that Drawback may be paid to the said Sirkars, or others. But, in many cases, the Collector cannot obtain verification of such requests, - to which the signatures may, or may not, be forgeries. Hence the above rule, to prevent disputes, or difficulties, in the event of the real owner, or exporter, returning to Calcutta, and presenting claim for Drawback.

No Drawback is claimable upon Goods exported which paid an Import by Sea Duty,—or a Transit Duty,—of only two and a half per cent.

Spirits, Wines and Liquors generally,—if they were imported in wood and are exported in bottle, can claim no Drawback, but may be exported free from duty. If imported in bottle, prescribed proof thereof given,—and exported in bottle, the mere change of larger for smaller package, or vice versá, will not bar the claim to Drawback.

Goods regularly exported from hence on board a British vessel bound to Rangoon, with the intention that they shall be there transhipped to a Bruish vestel bound thence to Great Britain, may, under regular claim, receive Drawback exactly as they would if they had been shipped on board a vessel bound direct to Great Britain from this port. It is, of course, necessary that full proof, in the prescribed forms, should be given of the claim to Drawback, previously to the exportation of the Goods from hence. And before payment of Drawback here, a certificate must be produced from competent authority at Rangoon, shewing that all such Goods have, bona fide, been shipped there on hoard a British vessel bound to Great Britain, and that no part of any duty I vied on them at Rangoon has been refunded on their exportation from thence; for, otherwise, the Goods would be entitled to only the same Drawback here, as is allowed on the general country trade from one Presidency to another. (Letter from Board of Customs, 31st July 1824.)

Row nnahs and Drawbacks - From half past 11 o'clock till 3 o'clock (when the R gister Numbers of the day are closed) the Draw. back Department will attend to the examination of the currency, &c. of Rowannahs, and to attesting the rate of Transit Duty paid, and no such examinations. nor attestations, can be made upon Rowannahs and Chellauns presented after 3 o'clock on each day.

After three o'clock daily, the Department in question will examine claims for Drawback. - draw out Drawback certificates.—prepare Drafts on the Treasury. &c - examine Imago Bonds, —prepare Indigo Bills. &c. &c. These will be attested by the Drawback Supervisor and held ready for delivery and presentment between the hours of opening the Office and half pass 11 o'clock on the succeeding day; or being ready, will be delivered, or sent out at any time while the Office is open

Drawbocks or Discounts in Invoices. Discounts or Drawbacks allowed in England on export of Goods from thence, and inserted in Invoices, are not to be allowed for, on import of the Goods here. Duty is to be levied on the full sum shewn in the Invoices, including the amount of such discounts or drawbacks. (Board of Trace, March, 1821 and Audit 43 and Re-Audit 48 of 1822)

Rowannahr. Whether original or exchanged, are current for

only one year from their respective dates.

If their currency expire on one day when they are presented at Office, they cannot be admitted: -- for instance, a Rowannah granted

or dated the 1st January 1824 and presented at Office the 1st Janua-

ry 1825, is time expired and inadmissible

To exempt from duty, or to secure Drawback, Rowannahs must be presented at the same time with, and their particulars must be entered upon, the Export Chellaun or Application. Rowannahs presented at any time subsequent to the reception at Office of the Export Chellaun are of no avail,—and no refund can be made of duty levied in consequence of the absence of Rowannahs at the proper time.

Relanded Goods. If Goods are exported under Rowannahs then current, but are relanded, and are not finally re-exported,—then such Goods are considered as fresh exports,—as if they had never been covered by Rowannahs,—and duty is taken if any be leviable.

A Rowannah cancelled for only a part of the Goods therein mentioned is returnable to the individual who brought it to Office, who has a right to claim it on giving a receipt for it. When a Rowannah has been cancelled for the whole quantity of Goods specified in it, retained in this Office.

The Export and Drawback Supervisors are strictly prohibited from examining, and from making any attestation upon Rowannahs, (unless they be Calcutta Exchange Rowannahs) of which the Seals, or Stamps, shall not be cut out, or upon which, besides, the word "Imported" shall not be found stamped.

The Appraiser will also be guided by the above rule.

Transhipments.—Goods transhipped in port, from one vessel to another, pay duty, if liable to any, the same as if regularly imported. But no Goods, whether dutiable or not, must be transhipped without due authority. All Goods transhipped, or attempted to be transhipped, without authority, are liable to seizure:—so also of Goods taken to any other vessel than that for which they have been passed at this Office.

Re-Exportations.—Goods which were imported by sea,—provided proof thereof be furnished by giving, on the face of the export Application, the No. and Date and particulars of the import Application - are exempt from duty on re-exportation, and may, in many instances, claim Drawback. But no information to enable parties to claim exemption, or Drawback, can be given from this Office.

Re-Importations.—Goods imported which are stated to have been exported from hence, are nevertheless subject to duty as fresh importations,—unless they have returned from some one of the Hon'ble Company's own settlements in India and are accompanied by a Certificate signed by the Collector, or by some authorized public Officer at that place, shewing that they were imported there from Calcutta:—also, in such cases, the Import Application must give the No. and Date of, and other particulars relative to, the Export Application; upon which latter if any Drawback have been paid, the amount must be refunded into the Office Treasury before the Goods re-imported can be admitted to Free Entry.

If Goods shall be returned to this port from some one of the Honourable Company's own Settlements in India, and shall, at the time of re-importation, be accompanied by duly signed Certificate shewing that said Goods were imported there from Calcutta, then such Goods, of all sorts, without reference to the Colours under which they were exported hence, or come back to this port, shall have Free entry here, whether they went Free, or paid Duty, on exportation hence. But it is indispensible to the grant of this indulgence that the re-im-

Date with other requisite particulars, and that he shall repay any Drawback which may have been paid on the expertation of the Goods from hence. It is to be distinctly understood also, that no part of any duty which may have seen had on expertation of the Goods from hence will be refunded, and that shoul any Goods. So resimported, be brought for re expertation they will be charged with Duty, if liable to any, as a fresh expertation

Weighable Goods Me are imported from England direct,—foundrin this Office to be of British produce or manufacture, and not liable to duty,—need not be weighed on the Wharf: the invoice weight, or that of the Bill of Lading, may be taken for Registry, 'So, likewise, Metals may be exported without weighment on the Wharf assuming the weight as per Export Application; provided that "No Drawback" be written on that document, and that proof of claim to free export be given thereon by quoing the No. and Date and other particulars of the Import Application, though no information as to these points can be supplied from the Dince. The proof in question must be given, or, in several instances, Metals are considered to be from Nepaul (as see Table 3, Reg III of 1811) and

Goods which were weighed on the Wharf upon importation and paid duty accordingly,—and which prove claim to Dr. weach on exportation,—must be re weighed. But if the Hard That Waiter shall attest, upon the Export Application, that the trends of ecified therein have never been remarked from the Custom Mouse promises since imported, nor any position thereof,—then they need not be re-weigh-

ed for exportation

charged with export duty,

Goods generall abschare entitled a Free Import, or to Free Export without Dra wack (or when Drawback is specifically declared to be reinquished, may be pass d w nont weightness. In respect of Imports, the Invoice or Bill of Lading weight,—and in regard to Exports the Approximent weight, may be admitted for Registry. But this rate must be constructed as including any Goods whatever, except such as are absolutely Free on Importation, or on Exportation, or in imited amount.

Flint Stone, Chille Coals These are dutiable, but may be passed upon Invoice or Bill of Lading weight without weighment on the

Wharfs.

Cock. ts.— These documents must always be delivered at this Office at the same time with sworn Import Manifest,—but will be restored when the vessel clears outwards.

Invoic's - The Collector is to judge of the admissibility, or otherwise, of Invoices, and his decision is to be final, - this being a point left to him by the Regulations. (Letter from Board of Customs, 22d

March, 1822.)

Invoices dated at any given place, if they shew value of Goods in coins or in monies of account, or weight in weights,—not commonly in use at that place,—are to be rejected. If Goods, for instance be brought from Bombay, with an Invoice dated there and drawn on in Sterling Money, or in Avoirdupois Weight, that Document is not admissible:—unless, indeed, it be accompanied by a formal Certificate proving that those Goods were imported into Bombay direct from Great Britain,—in which case they will generally, have free import here whithout such certificate, it will not avail to say that the Goods did come from Great Britain, (not even though the lavoice

# Bengal Civil Fund.

INSTITUTED IST OCTOBER, 1804.

The object of this fund is to provide for the maintenance of the widows and children of such of the subscribers as may not at their demise, leave property sufficient for the subsistence and education of their families; also to assist in maintaining such of the subscribers themselves as may be compelled by sickness or infimity to return to Europe, without an adequate provision for their support.

It is at the option of the civil servants of this establishment, either to subscribe thereto or otherwise.

The contribution payable by each subscriber is deducted from his monthly allowances by the sub-treasurer, collecter or other officer, paying the same, and transferred to the treasurer of the fund. The committee of immagers may in particular cases, admit a deviation from it, if a different mode of payment shall be desired by any subscriber.

All applications for admission to the benefits of the fund are to be made to the committee of managers, and to be accompanied with the necessary information, documents, and proofs to enable the committee to ascertain the circumstances and situation of the party applying. The managers, after calling for any further information or evidence which may appear to them requisite are to submit the whole case for the determination of the subscribers, at the next general meeting. In cases of emergency and distress however, when the managers may consider the claim valid, they are authorized to advance such proportion of the fixed allowances hereafter specified as may appear to them indispensably requisite, until a determination can be passed by the subscribers.

Any subscriber to the fund who may be compelled by sickness or in infirmity to proceed to Europe for the recovery of his health, and shall not be possessed of sufficient means to pay for his passage to Europe, and support himself and family during his necessary absence from India, on his making a declaration upon oath to this effect, or otherwise establishing the fact, and producing a certificate of the necessity of his return to Europe, solemnly utseted by the surg-on who has attended him and counte signed by a member of the medical board, with the consequent permission of government for his proceeding to Europe, will receive from the fund a donation, equivalent to the Company's allowance for a twelve-month to a servant, of his rank when out of employ, viz. if he be a senior merchant, 4000 sicea rappers, if a junior

On the death of any subscriber to the civil fund, who may not be possessed of property sufficient to provide for his family, and may, consequently, leave a wite, cohabiting with him or maintained by him and living under his protection to the period, of his decease, without an adequate provision for her support, as hearatter specified; if, on the information documents and evidence, which may be submitted by her to the managers of the fund, it shall appear to the satisfaction of a general meeting of the sub-cribers that she is a proper object, a pension is to be assigned to her, under the provisitions and limitations stated in the following article, Provided that nothing contained therein, or in any other part of the rules for this institution, shall be considered to entitle her to the benefits of it, any widow, who may have been legally divorced or separated from her husband for adultery; or who at the period of her husband's demise, may have quitted his protection and he living in a state of notorious adultery, though not divorced or separated from him by law.

Europe Goods. All Goods of the manufacture either of British or of Foreign Europe, imported otherwise than direct from Great Britain on vessels trading under the Acts of Parliament, pay Duty at Ten per Cent, from a British Bottom, and at Twenty per Cent. from a Foreign Bottom "unless they are specifically named in Table I. of Regulation III 1811, as liable to other rates of Duty. Pieco Goods, for ustance, from an exception of this kind if they be made of Cotton; but cambric, gauze, lawns, &c. (if real) are made of Flax or of Hemp, and class with "Europe Goods,"

American Goods. The preceding Rule is applicable also to Goods from America, which, in respect to the trade with India is placed, by Regulation III. of 1811, on the same footing as Euope, consequently, no Goods from cither Europe, or America, can ever class with 'Un-enumerated Articles:"-for, if not specifically named in Table I. of Regulation III. of 1811, they fall under the general term of "Europe Goods." and pay import duty accordingly.

Un enumerated Articles Imported. Not being "Europe Goods" (which term includes American Articles) nor "China Goods." and not entered under specific names in Table I. of Regulation III. of 1811, pay, on importation, 5 per cent. from British, and 10 per cent. from Foreign Bottoms. Hence the term "Un enumerated" (vide Section VII. of Regulation III of 1811, is applicable only to Goods which are not the produce or manufacture of Europe, America, or China; for when the Goods of those countries are imported, not being specifically named in the Table above minimized, they class under the General Heads of "Europe Goods," or of "China Goods," even though not imported direct from the place of their growth or origin. On the other hand, Goods which are not produced, not manufactured, in Europe. America, or thina. cannot be glassed, under those General Heads, even though imported direct from see or other of those places; on such Goods duty is to be levied according to specific names in Table I. of Regulation III. of 1811, or if not distinctly specified thereis, then as "Un-enumerated." Goods which are produced or manufactured in other quarters, as well as in Europe, America, or China, do not class under the above Generat Heads, unless they come direct from Europe, America, or (hina; or unless, by documentary or other good evidence, they are proved to be of the growth or manufacture of Europe. America, or China, though not direct from those countries: otherwise they pay duct according to specific names in the Table above mentioned, or. if they be not specifically named therein, then as "Un-enumerated." N. B. The above Rules are not applicable to Goods imported: from Great Britain on vessels trading under the Acts of Parliament.

Un-enumerated Articles Exported. Goods of the produce or manufacture of this country, which are not specifically mentioned in Table III. of Regulation III. of 1811, as liable to other rates of duty, or which are not declared exempt from export duty by that Regulation, or by others, pay Five per Cent. on exportation to British Ships, and Ten per Cent. to Foreign Ships.

M. B. The above Rule is not applicable to Goods-exported to Great Britain. unless, they, be shipped as stores, for use on board,

and not manifested as Cargo.

Made un Articles. All Goods of country produce which interestingual state, are liable to an export duty, or are entitled to free export, must, if made up into articles by which that originalistate is or altered, (unless such Articles are specifically named in Table III, of Regulation III, of 1811, and declared exempt from export duty) pay aduty of five per cent, on exportation to British Bottoms, and of ten per cent, on exportation to Foreign Vessels.

And all Articles (such as Furniture, Bedding, Wearing Apparel, and the like) made up of Goods which, in their original state, came in free, or on payment of duty, on importation by Sea, are to be exported free, notwithstanding the alteration of original form, or state, by having been made or worked up. Except, however, Utensils of any kind made out of Iron, Copper, Lead, &c. which pay five, or ten, per cent. Export duty, according to colours of ships (unless, specifically declared free) though the raw material may, on importation by sea, have come in feee, or have paid duty.

the Costom House, and to obviate difficulties and delays, the sanction of the Board of Customs, under date the 16th February, 1825, has been obtained for passing Chanks in the manner below stated. But it is, of course, at the option of Applicants to pass their Chanks in the

mode which has hitherto a blained.

An average has been made of the quantities of various qualities. (eleven in number) of Chanks imported during the past three years, at prices varying according to quality from Sa. Rs. 26 to Sa. Rs. 3 per 100. The largest quantities imported have been of Teethcory at Sa. Rs. 16, and of White at Sa. Rs. 7½ per 100. The average of the whole gives Sa. Rs. 12 108 or say, Sa. Rs. 12½ per 100.

First. That; Chanks be passed as per number stated in Bill of

Lading, and Duty levied as per Invoice price.

Second. That if Bill of Lading, specifying number of Chanks, be produced, but no Invoice (or that document rejected). Duty be levied on that number, at the average rate of Sa. Rs. 121 per 100. Chanks.

Third. That in cases when no Bill of Lading shewing number is produced, twenty bags, such as are designated two maunds Rice Bags, be filled as full as they can hold of Chanks, taken indiscriminately as they lie in heaps; that the number contained in these Bags be then counted; that the whole of the Chanks required to be passed be then filled into bags in like manner, that the further process be, wiz. It twenty bags be found to contain 1,500 (hanks of all sorts, then 2,000 bags (as the supposed total of filled bags) will contain. Labo,000 of all qualities; to be valued for Duty at Sa. Rs. 124 per 100.

Fourth. If an importation of Chanks be ascertained to be totally broken and damaged, the number to be ascertained, in the manner just above mentioned; the value to be fixed by sale of twenty lots of 100 each on the Wharf, viz. if the 2,000 Chanks sell for an aggregate sum of Sicca Rupees 40, then the average of the whole will be Sa.

Rs. 2 per 100 for levy of duty.

Bills of Health. His Majesty's Government of Mauritius having signified that all vessels arriving at that Island from any of the Ports of India must be provided with Bills of Health, otherwise they will be subjected to the enforcement of the Quarantine Regulations, Notice is hereby given that Applications for such Bills, for vessels sailing from this Port to Magritius, are to be addressed to the Secretary to Government in the General Department—General Department, 7th October, 1824.

Act 4th Geo. IV. Chap. 80. To guard against possible inconvenience from doubts as to the purport of the Act 4th. Geo. 4th, Chap. 80,
il am directed to request you to instruct the Collector of Customs at
Calcutta that, in regard to the Encry of Ships trading to this port and
the settlement of Custom Duties, he is to proceed on the assumption
that the said Act does not apply to Vessels trading merely within the
ilimits of the Company's Charter; and the vessels registered under the
Regulations of 1786, trading between places within those limits, are to
be admitted as heretofore.

This explanation has expected proper for the guidance of the Collector, though it is possible, that all Ships entitled to be Registered under the provisions of the Registry Act, though not designed to trade beyond the limits of the Company's Chatter, will (as it is advisable they should) be Registered in conformity with that Law. Council

Chamber, 9th of July, 1824.

Opium. When persons require to export Opium it is essentially necessary that the article should be brought on the Custom House premises at an early hour of the day on which the exportation is to be made, in order that the Applicatious may be put regularly through all forms of Office in the course of that day. To this end it will be indispensible that the Opium certificates should be obtained from the Office of the Board of Customs, Salt and Opium, on some day prior to that on which the article is required to be exported. No "Note Pass" will be given

The Honourable Company's Ships proceeding from honce to Chi-

na, cannot be allowed to export any Opium whatever.

Orders of Co. rt of Directors, 7th April, 1834. Ditto of Government, 9th September, 1824.

Letter from Board of Trade, 17th Do.

Bonded Goods. Whenever Applications are made to export Goods for Transit Duty on which a Bond has been executed, it is required that the Bond Rowannah be brought and presented with the Application. Unless such Rowannah be produced with the Application, in order that the quaintity about to be exported may be noted off thereupon, the Export Supervisor is restricted from preparing the Perwannah or Pass.

The specification and particulars of Bond Rowannahs must be inserted upon the face of all Applications in the same way as is now done

in respect of Exports under common Rowannahs.

It is also required that the word "Bonded" be inserted upon the face of all Applications for the expertation of Goods, which are under Bond, otherwise the Expert Supervisor cannot prepare the Porwagnab. If-not Bonded Goods, then the word "Common."

It is further required that, upon the Importation of Bonded Goods from the Interior, and as soon as the weight actually imported shall have been certified upon the Bond Rowangahs in the Inland Custom House, those Rowannahs shall be taken to the Drawback Supervisor in this Office who will write upon them, "seen, this—day of—. 18—," and sign his initials. Without this declaration upon Bond Rowannahs the Export Supervisor will grant no Perwannah or Pass for the exportation of Bonded Goods.

When Merchants export Bonded Goods, not Bonded by themselves but purchased from other Merchants, a certificate of the fact of such sale must be granted, in future, upon the back of the Bond Receipt by the original Importers, and not (as often heretofore) upon

detached paper.

Dryage. Merchants, who are likely to require any allowance for dryage, or wastage, will do well to ascertain the order on this subject

previously to the period for adjusting their Bonds.

Place of Produce or Manufacture.—The onus of shew g the place of growth, or manufacture, of Goods imported on British ships from

the Univea Kingdom, must rest with the Importers.

When, therefore, such proof may not, from any cause shatever be forthcoming, the Custom House will consider such Goods as being the groduce and manufacture of places to which the Acts of Parliament do not apply, and will consequently subject them to the rates of duty fixed by the Regulations which were in force porously to the promulgation of Regulation IV. of 1815.

Spirits. On the importation of Spirits in casks, or other wooden vessels, the Collector is to require his Officers to ascertain, and report, whether the same are ultaged, and if so, the number of Inches so ultaged. If the ultage does not exceed two Inches from the bung, no deduction for leakage is to be admitted, as it may then be presumed that the casks have been filled in a ther before they were removed from the Importing Ships, or after they were landed

When the ullage exceeds two inches, but falls short of five Inches, the prescribed deduction for leakage at the rate of 10 per cent, is to be allowed on the standard quantity of each cask, wor other wooden vessel, so imported and examined; as the probability then will be that such casks have not been filled up, but landed as originally shipped.

When the ultage may be more than five turnes, the quantity is to be determined by gauge, according to the practice heretofore observed

at the Custom House

If in any one of the cases where deductions for leakage are not authorized in these instructions, the Importer turnishes a declaration verified on oath, purporting that the casks have been landed precisely in the same state as that in which they were consigned, the benefit of the Rule prescribed by clause 10th, Sect. 48, Regulation IX. of 1810; is to be admitted in like manner as it is now declared applicable to cases where moderate leakage has taken place.

Nevaul and Oude Goods. - Goods produced in Nepaul and Oude

"as well as in the Commany's Perritories.

With a view of securing, as far as possible, the recovery of the authorized dues of Government, the Collector is requested not to allow the exportation Free of Duty of any Goods which are described in Table III. Regulation III. of 1811, as being the produce equally of the Company's Territories, and of Oude and Nepaul unless satisfactory evidence is, in every instance, afforded, by the Exporters, that the Goods intended to be exported are not the produce or manufacture.

of one or other of the places last mentioned. Where such evidence is not furnished, the export duties prescribed by the Table adverted to are invariably to be charged.

Wines and Beer .- The duty on Wines and Beer imported in wood

is to be settled without any deduction for ullage.

Town duty Goods Relanded... With respect to the following Goods upon which Town Duty is leviable, no Applications to reland any such as may have been regularly exported through this Office will be attended to unless they shall bear on the face of them a declaration from the Inland (ollector, or from an authorized person in that Office, person in that Office, person the mitting such Goods to be carried back into Town.

Castor Oil.

Dholl, Gram, Boot. .

Sugar.

Oil, and Oilseed.

Ghee. Tobacco. Rectel-nut. Turmeric. Charma'.

Jaggree.

Goods Removed from Wharf. - Upon general principles there are many objections to the admission of declarations, rala ive to execuptions of Goods, given in after those Goods have been removed out of the reach of examination.

No other evidence will, in future, be admitted by the Board of Customs, for determining the description of Goods, then what is furnished in the original Applications under which they are extered in the Registers and passed through the Custom House; and if, in such Applications, the terms used should be tound, after the Goods have been once removed from the Custom House, to have been incertacily adopted, the duty upon the Goods is, nevertheless, to be invariably regulated according to the designation which may have been given of them upon the face of the Applications, and not according to the explanations turnished by Individuals subsequently. This resolution is irrevocable, nuless it should be set aside, in any case by orders from Government.

Ship's Papers.—Commanders of Vessels are requested to observe that it is necessary they should produce their Ships' Papers for examination in the Expert Department previously to obtaining Port Clearance.

Forms of Office. - Specific orders upon Chellauns and upon other documents, under the signature of Covenanted Officers, are more frequently required than is at all necessary ; - and the unavoidable consequence is, that Merchants, their Clerks, or Sirkars, Commanders of Vessels, and others, are obliged to go backwards and forwards in the Office much too repeatedly, which cannot but be inconvenient to them, and must occasion needless delay in the transaction of bu-The personal agency of the Covenan ed Servanis may be judiciously restricted; for they are now certainly engaged in some matters of detail, which might very well be left to others, without particular orders. As far as the machine of the Custom House has to move by fixed Laws, a moderate degree of interference on the part of Covenanted Officers ought to suffice. Their business should be not to drag it in the Ordinary routine, but to check irregularities, and to counteract accidental or unforeseen obstructions: all General Rules. in short, should be observed by Uncovenanted Servants, of all classes. without particular orders.

Goods, with their Marks and Numbers, &c. should be reported on the Wharf; .. and weighable Goods weighed (all Metals in full).

but Pepper, Beetle-nut, Sugar, Coffee, Spices, &c. if in Robins, Bage, or Packages, all of same size, only 10 per Cent) Goods should be poted off Manifests, or declared not to be in Manifests; attestations should be made of examination and particulars of Invoices (after Invoices have been admitted by Covenanted Servants) and of Cockets:-Import Register Numbers should be certified as correct, or incorrect, when give to cover Exports, or to claim Drawbacks; attestations of examination of Certificates from other Presidencies should be made; -Import Cargoes should be examined upon Application; Rowannahs should be examined, and place of produce or manufacture, rate of transit duty, &c. and Drawback, or No Drawback, certified : Applications for Drawback, Certificate should be examined and Certificates prepared; - Drawback Certificates certified as correct, or as rejected; Appraiser should send for Goods or particular Packages, from the Wharf, and should certify contents correspond, or fix value; Export Cargoes should be examined; Port Carances should be prepared: Export numbers given, either for Drawback. or for reclaim of Deposit on Sugar, &c. should be examined, and declared correct or incorrect; Applications for Certificates of Imnort duty paid, or for certificates of drawback not paid, or not payable on Exports, should be examined and certificates accordingly prepared if all be right; Letters permitting Ships to drop down the River, if the Commander declares in writing that one of the Import targo remains on board, and if the application for leave to drop down have been signed in the Master Attendant's Office: All these are General Rules, which should be attended to, and acted on, in the various Departments of the Office, and on the Wharf without any particular or specific orders from Covenant Officers. There may be some more General Rules not in the Collector's recollection at this moment, which can be added to this list, if Supervisors, or others will bring them to his notice. Nothing herein said need prevent Supervisors, Assistants, Tide Waiters, &c. belonging to the Office, nor Merchants, their Clerks, or Sircars, from applying to the Collector, or to his Covenanted Deputy, or Assistants, whenever they may see occasion to do so; for the object is to facilitate business, very much more than to get rid of the trouble however seemingly useless.

The covenanted executive Officers, the uncovenanted Assistants, and the natives employed, as also the Tide Waiters, will be in atten-

dauce at ten o'clock.

After three o'clock, no orders whatever will be given, nor any reports or calculations made, upon any fresh applications; nor will

any additional Register Nos either free or duty, be granted.

All applications upon which duty shall have been paid, or regular deposit taken, by three o clock, shall be put through all remaining Forms of Office in the course of the evening. As a convenience to those who may wish it, if they should find themselves too late, Cash, (not Paper Money, which may be taken back without difficulty,) will be received by the Cash keeper, as duty or as regular deposit, between the hours of three and four o'clock; but the applications will not be put through any further Forms, and will be retained by the Treasuser till the following day.

Applications which have gone through any form of Office by three o'clock, will be put through as many more as possible up to four, but if not then completed, must stand over till the next opening of Office. The remaining period of day, light is required to bring

pp Registers, &c. so as to prevent arrears.

But covenanted executive Officers, and all others, will attend, as long as may be requisite, even though beyond four o'clock, to complete Passes, either Duty or Free, with respect to all such applications as may have gone, through every preliminary Form of Office previously to the clock striking three.

The Rules for non reception of fresh applications after three

o'clock, &c. apply to the Ofice only, and not to the Wharf. .

Guns, Cannon, Arms, Ammunition. Nothing whatever of this kind, (except bond fide Fowling Pieces) can be either imported, or exported

without special permission from Government.\*

Gunpowder. Gunpowder cannot be imported into Calcutta without special permission from Government. With that sanction a certificate under the signature of a sitting Magistrate, shewing that the Importer has a safe and proper place for storing the Powder, must be presented, and then no more than 1000 lbs. can be passed at one time; upon proof that such quantity has been disposed of another 100 lbs. may be imported, and so on.

But any quantity of Powder may be brought up from Moyapore, and lodged in the Magazine at Howrah. from whence it may be im-

ported into calcutta in quantities as above mentioned.

Second-hand Articles. Second-hand Articles, such as Carriages, Piano-Fortes, Books, &c. if declared by the Appraiser to be second-hand, used, and not new, and if brought out in the Ship on board which the owner himself came to Calcutta, may be imported free

from duty.

Cloves, Nutmegs, and Mace. Cloves, Nutmegs, and Mace, are allowed free entry if declared by Certificate to be the produce of any place in India belonging to the Crows. or to the Company; but they must come direct from that place, and the Certificate must be signed by the Collector there, or by the Secretary to Government, or some other Public Officer. If imported without such Certificate, these Articles are dutiable.

Spice Oils. Spice Oils are dutiable, without, or with, Certificate. Rum. Rum, country made, in quantities of 1000 gallons or upwards, goes free on exportation to all Bottoms; but any smaller

quantity is dutiable on export

If proved to have been manufactured in a British possession in Asia, or in any place in Africa, or at any place not mentioned in the Regulations, (Europe, America, and Foreign territories in Asia, being the only places mentioned therein) pays 5 per cent. on importation from British Bottoms, and 10 per cent from Foreign Bottoms.

If made in British or Foreign, Europe, or in America, pays import duty 10 per cent. from British Bottoms, and 20 per cent. from

Foreign Bottoms.

If manufactured in Foreign territories in Asia, pays 30 per cent. on importation from British Bottoms, and 60 per Cent. from Foreign Bottoms.

Indigo Bonded. Indigo bonded, exported on British Bottoms to Great Britain, Gibraltar, or Malta (being the manufacture of the British territories) goes free, and is exonerated from the Transit Duty engaged for into the Bond: if it he the manufacture of Oude, it is exonerated from half that Transit Duty.

Exported on British Bottoms to other places than those above mentioned, and being the manufacture of the British territories, pays

the Bonded Transit Duty, viz. 5 per cent: if the manufacture of Oude, it pays 22 per cent. Export Duty, in addition to the Transit Duty.

Exported on Foreign Bottoms, if the manufacture of the British territories, it pays 5 per cent. Export Duty, besides the Bonded Transit Duty; if the manufacture of Oude, it pays 7½ per cent. Export Duty, besides the Bonded Transit Duty.

If the whole quantity of Indigo imported into Calcutta under Bond, be not exported within twelve months from the date thereof, the Bond cannot be renewed unless the quantity not exported shall

amount to 1000 Maunds, or more,

Smaller quantities of Indigo than 100 Maunds, remaining unexported, at the end of twelve months, under two or more Bonds, cannot be added together for the surpose of obtaining. One renewed Bond for 100 Maunds or upwards. Each Bond must be adjusted by itself without reference to other Bonds.

Dryage. If no part of the Indigo imported into Calcutta under a Bondshall have been exported within the year and the Bond have not been renewed, no allowance can be made for dryage in calling for Transit Duty with interest.

Common Rowannahs may be taken out at the Calcutta Inland Custom House for such portions (being less than 100 Factory Maunds) of Bonded Indigo, as may remain unexported at the close of twelve

Months from the date of the Bond.

In the first place, however, each Bond must be adjusted and concelled, by paying the established Transit Duty, with Interest, in the Sea Custom House, for whatever quantity of Indigo may remain unexported under the Bond, at the expiration of twelve months from its date.

Certificate of the adjustment and of the payment, as above, will be granted in the Form subjoined, on seeing which the Inland Collector will issue a Common Rowannah (without any charge whatever to the Individual taking it out) for the balance quantity of any one Bond; or for the agregate quantity of the unexported portions of several Bonds in cases where the adjustment of two or more Bonds may have been attested in the same Certificate. And upon such Rowannahs the Inland Collector will distinctly state the No. of the Certificate and its date, specifically declaring each Rowannah to be valid for one year only from the date of Certificate. Under such Rowannahs claims to Drawback will be admitted for Indigo covered by them, if any be claimable, and if the Indigo be exported in the manner, and within the time, required to substantiate the claim.

Applications for such Certificates must be made to the Sea Collector at leas: Efteen days prior to the expiration of the currency of the condition of the Bonds upon which they are required; other-

wise Applications will be rejected.

For quantities of Bonded Indigo to the amount of 100 Factory Maunds, or upwards, remaining unexported at the end of twelve Mouths from the date of the original Bond,—the Bond must be renewed as heretofore.

### FORM OF THE CERTIFICATE.

No.—Certified that Messrs.—have adjusted the Bonds below mentioned, by paying Transit Duty with Interest for the following quantities of Indigo remaining unexported.

Calculta Govi. Sea Custom House.

Collector of Sea Customs.

(Date)

The quantity of Indigo and other particulars specified in Bonds, must correspond with those particulars as inserted in Bond Rowannahs, otherwise the Bonds are returned to the Moofussil Collectors.

Bonds are vitiated by an alteration or erasure of any kind.

There must be two respectable parties to each Bond, and one of them must be resident in Calcutta. Two Members of the same Firm form but one party. The signature of each party must be

testified by a distinct witness.

\*not in this Office, either because not yet received from the Moofussil Collector, or because returned to that Officer for correction, a deposit will be required equal to the amount of Transit Duty; which will be returned as soon as the Bond is received. In other words, the Bond must be forthcoming as well as the Bond Rowannah; or deposit for Traisit Duty must be made before exportation can be allowed.

The parties who executed he Bond are, of course, the responsible persons. - and not those who may have purchased and exported the Indigo. Therefore the former, for their own security, would do well, at the time of elling, and before delivering over Bond Rowarnahs, to take engagement from the latter to answer all eventual demands for Transit Duty; not, however, that this Office will attend to any such engagement, but will settle with the parties to the Bond.

Indigo not Bonded. Indigo not bonded, exported on British Bottoms to Great Bruain. Gibraltar, or Malta, being the manufacture of the British territories and accompanied by Rowannahs, goes free and has 5 per ent. Drawback. If it be the manufacture of Oude and with Rowannahs, it goes free and has 25 per cent. Drawback.

Exported on British Bottoms to other places than those above mentioned, being the manufacture of the British territories and accompanied by Rowannahs, goes free, but gets no Drawback. If without any Rowannah, or with Rowannah shewing it to be from Oude, it pays 2½ per cent. Export Duty.

Exported on British Bottoms to Great Britain, Gibraltar, or Malta, but without any Rowannahs; goes free, but has no Draw-

back.

Export on Foreign Bottoms, being the manufacture of the British Territories and with Rowannahs, it pays 5 per cent. Export Duty. If without any Rowannahs, or with Rowannahs shewing it to be from Oude, it pays 75 per cent. Export Duty.

Indigo Tare. On exportation of Indigo to Great Britain (not to any other quarter) the Tare as per original Factory (not Calcutta)

In oice may be admitted, if such be the wish of the exporters.

Applications for permission to allow ship to drop down the river.—
The Application, addressed to the Collector of Sea Customs, is first to be taken to the Master Attendant's Office, in order that that Officer or his Deputy, may sate upon it whether there be any objection to compliance in that Department.

The Application is then brought to the Custom House, and, at the foot of it, the Commander, or the owners, or the Agents

for the Ship, must distinctly state whether any part of her Import (argo remains on board, or not .- If any part do so remain, it must be mentioned in detail, when a Tide Waiter will be sent on board to examine and to report.—If that I ide Waiter should report that he has not seen the packages said to be on board, or any portion of them, or if he should report having been informed on board that the said packages, or any portion of them, are under other cargo and cannot be got at, then (before the Ship can have clearance) duty will be required on the contents of any packages not seen and examined by the Tide Waiter, if the Goods be dutiable .- If the Tide Water shall attest having seen and examined all packages declared to remain on board, the permission for the Ship to drop down the river will be issued. If it shall be declared by one or other of the parties abovementioned that no part of the Import Cargo does remain on board, the permission for the ship to drop down will be immediately issued. But by such declaration the party who made it becomes responsible for duty eventually, in case it should be found, in the course of subsequent adjustment and settlement of Import Clearance, that any portion of the Import Cargo has not been reguiarly cleared through the Custom House: documentary proof of delivery out of the ship will, of course, exonerate from responsibility.

Salt Provisions — Their importation into Great Britain is prohibited. If exported for presents, or for any other purpose whatever, to vessels trading under the Acts and bound to Great Britain, duty at

the rate of 5 per cent. will be levied.

Applications to Pass Articles before a Ship has entered — Nothing whatever, imported by Sea, be he same of what kind or description it may, (except mere baggage) can be passed at the tustom House, until the Ship shall have delivered in her sworn Import Manifest, and shall have been admitted to entry.

Bullion and Specie.—The Applications to pass, are first to be compared with the Import Manifest of the Ship, and noted off that document as usual—They are then to be referred to the Appraiser, who will open and examine one (or more, according as the number of packages he smaller or greater) of each kind of Bullion or Specie particularized in the Application;—after which, orders for registry, and for passing, will be given as customary.—Should Bullion or Specie be landed late, when they cannot be put through the forms of Office the same day, the packages may be lodged for the night in the Office Treasury if required;—but this will be done wholly and exclusively at the risk of the proprietors, and not on the responsibility of the Collector, nor of the Office.—The same rules are applicable to Pearls and to Precious Stones;—but in no case can "Note Pass" be granted, whether for these, or for Bullion or Specie.

Objections to Audit Orders — To prevent individuals from protracting the adjustment of demands for recovery of duty short levied as directed in Audits, the Board of Customs requires that appeals from, or objections to, the items of demand, be sent in to the Collector, who will forward them to the Board for consideration, accompanied by any observations which he may himself have to offer on the points at issue.—Any demand not objected to within a week from the date of its being made, must be considered as admitted by the party concern-

ěd, and the amount must be recovered.

Lists of sums accidentally, or erroneously, over levied as duty, are hung up in the Cash Keeper's Department, immediately on the

receipt of each successive Andit, and will be refunded forthwith to

parties concerned, upon their application.

Wharfage and Godown Rent.—Sums claimable as Wharfage, &c. for Goods left lying on any part of the Custom House premises, or in the Godowns appropriated for public use, beyond the number of days prescribed by Regulations, must be paid before those Goods can be allowed to be removed.—If not paid, the Head Tide Waiter is authorized to detain any one package, or more if necessary, as security,

till payment be made

The covered eassage between the double ranges of Godowns are not at all intended for the deposit or stowing of Goods: - they are required to be kept tree and open, so that the renters of those Godowns may, at all times, have ingress and egress, to and from their respective Godowns, without in destation, hindrance, or difficulty of any kind. The renters of those Godowns, consequently, will do well to recollect that a tax is leviable upon all Goods left lying in, or under, those passages, or the verandahs at the ends of them, which is purposely fixed at a high rate in order to secure the object above mentioned. - The same authority as before stated is given to the Head Fide Watter, for ensuring the payment of this tax.

Expert Manifest — Ships bound to England, but to touch at other ports intermediately, must have all Goods destined for such intermediate ports distinctly entered in their Export Manifests, as well as the

Cargo intended for Great Britain.

Suct. Suct is commonly put up in casks for exportation in a pickle made of salt and water. Besides the tare, a deduction from gross weight of each cask to the extent of twenty seers will be allowed on account of the pickle.

Floating Deposits Note Passes With a desire to oblige indiviseduals, the Collect r has accasi hally taken "Floating Deposits" for duty and has granted what are called "Note Passes" for Goods; but this informal and really irregular practice has been found to occasi no so much difficulty and confusion in the Office, from the delayed adjustment, of such deposits and from the non-return of such Passes to Office for registry, while complaints and even menaces of legal responsibility, have been addressed to the Collector, by Commanders and Owners or Agents for Vessels whose Port Clearances have been unavoidably delayed in consequence, that the said practice caunot be continued, nor will Note Passes even for Free Goods be granted in future. Note Passes will a number to be granted for any Goods for duty on which a "Regular Deposit" shall have been made; but no such Deposit of less than 250 Rupees can be received.

Applications for Examination and Settlement of Import Manifests, and for Port Clearance — It is too duty of the Import and export Supervisors respectively to note upon such Applications the date and hour of receipt, according to which they will be attended to in succession, and none can be taken up, out of turn, or in preference to others

previously received.

customary for Mercantile Firms to give Engagement to account for, or eventually to pay duty upon, any articles entered in Import Manifests which shall not appear to have been duly passed.—But many Packages are frequently manifested as "Merchandize," or as, "Sundries," &c. without any specification of contents.—(onsequently it becomes impossible for the Collector to determine the kind, quantity, or value of articles on which to levy duty eventually.—Henceforward,

therefore, a list must be made but of the articles not appearing to have been duly passed and their contents and value must be ascertained, or agreed to, by the parties tendering the Engagement and the collector,

before any such Engagement can be received.

Calculators, Bill and Perwannah Writers—No persons whatever can be permitted to crowd round, nor to stand in the rooms by the Import and Exp rt Calculators, or the Bill and Perwannah. Writers, These native Officers have strict orders to attend to every Application, whether Duty or Free, in the order in which it comes into their hands, and to take up none out of turn:—they must be left unmolested because they are hable to be fined by the Board of Customs, in Audit, for every mistake made by them.

M'eights.—Bazar and not Factory Weights are used at this Office-Merchants are at liberty to send their own Traingles, Scales and Weights (if Bazar) for weighment of their own Goods, if they please

so to do

Pilot Certificates.—If Goods are required to be shipped on board any vessel after she shall have obtained P rt Clearance, a Pilot Certificate will be granted for them, on application; after other usual Office forms have been observed.—Without such Ce tificate the Pilotis restricted from allowing them to be received on b ard. No Drawback

is arrived on Goods so passed.

Boat Notes — No Goods can be allowed to be landed fr m any vessel unless they be accompanied by a Boat Note, and without it, ire liable to seizure, — The Boat Note must specify the number of pickages of which each boat load consists, the contents, the names of Commander and Ship, and her Colours, to whom consigned, the date of landing, and the Nos and Marks, or Addresses, on them: with respect to Taleable Goods, such as Bars of Iron, &c. the Number of pieces must be stated.

Wharf Tickets.—Some Vessels are not able to receive their full cargo off Calcutta, and are allowed to drop down the River before Port Clearance is issued.—Perwantiahs, or Passes, for such Goods are taken to the Wharf, and, when they are passed, the Exporting Tide Waiter will give a Wharf Ticket, which will protect the Goods in going down the River.—Without such Tickets, Goods are hable to

detention

Old Copper. - The Collect r has been desired to conform to the following rules, whenever in future old opper belonging to Ships or

other Vessels in this port, is applied to be passed,

Should the Ships or Vessels from which old Copper has been stript, or obtained, have been built or have been repaired last in any Ship-yard in Calcutta, the Officer in charge, or Owners of the same, to be required to certify the act, naming the person by whom, and the date when the ship or Vessel was so built or last repaired, also the part of the Ship or Vessel sprepaired, and the quantity of Copper actually used on the occasion.—The Ship builder referred to in the certificate to countersign the same as evidence of the facts mentioned in it being correctly, stated. The person making the application to pass such old Cop. er, is, in addition to the evidence already adverted to, to accompamy his application by a certificate from the Ship builders, or other persons by whom such Copper may have been sold to him, showing the same to be old Copper, taken off from the bottem, or other parts of the ship or ressel specifying particularly the parts of the ship or vessel, from which the Copper may have been obtained, the date when, and the quantity so obtained and actually sold to the Applicant. When

Ship-builders or others by whom such old Copper may have been stript off from ships or vessels, are themselves the Applicants, their Applications are in lieu of the Certificate last mentioned, to be accompanied by declarations verified on oath before a Magistrate of Calcutta, upon each of the points last adverted to.—Applications to import old Copper, stated to have been obtained from condemned or repaired ships, thus supported, will be entitled to a Fee Register: otherwise to be rejected and duty to be charged on the article according to its value.

Old Copper obtained from ships not built or repaired at Calcutta, when applied to be passed is invariably to be subject to duty. because in such cases the article was not originally used from any importations previously made into Calcutta, and therefore no import duty could, as in the cases of ships or vessels built or repaired in Calcutta, have been charged on the same when new.

C pper to be exempted from payment of duty on importation into Calcutta, must either be the produce of, and imported from, Great Britain, or must be proved to have paid at some other Presidency, under the Honorable Company's Government, the duty of 10 per cent. fixed on the article by Regulation III. of 1811.

Mistakes having occurred on the part of Individuals applying to Government for permission for Servants to proceed on board Ship: with respect to the description of such Servants, the Governor General in Council is pleased to direct, that all persons applying to Government to authorize the reception of any Servant on board Ship, shall distructly specify in their application, after careful enquiry, the Country to which such Servant may belong.

His Excellency in Council is also pleased to direct that Extracts from former Orders of the Honourable the Court of Directors, relative to Servants proceeding on board Ship, be now republished for

general information.

Extract from a Public General Letter from the Honorable the Court of

Directors, dated the 19th August 1807.

Extract from Paragraph 17 of a Public General Letter from the Honor-

able the Court of Directors, dated the 11th of January, 1869.

Extract from a Public General Letter from the Honorable the Court of

Directors, anted the 22d July, 1814.

### "Tontine of India,"

FOR THE TERM OF SEVEN YEARS, COMMENCING 1st JANUARY, 1822.

Ending 31st December, 1828;

FOR THE BENEFIT OF SURVIVORS.

In consequence of the wish expressed by a great many of the Subscribers to the 1st and 2d Toutines, which terminate on the 30th June and 30th September next, respectively. It is proposed to es ablish a new one, to be designated the "Toutine of India."

In framing its Regulations, advantage has been taken of the experience derived from the management of the existing Toppines, and it is presumed the alterations in the new one will be satisfactory,—rarricularly to these already interested in the Tontines, by whom the improvements in the Regulations have been chiefly suggested.

The "Tortine of India" will commence under circumstances much more advantageous than either of the existing ones, as this presumed that in the course of the maning year, a large portion of the bunds of the ist and 2d Tortines, about Sa. Rs. 13,50,000, will be transferred to the Tortine of India.

The term of Seven years has been fixed on instead of five, the latter not being deemed a period of sifficient length to give full operation to the principles of Tontines. Subscribers to the 1st and 2d Tontines who may wish to re-invest their dividends on the termination of these Societies, but who may not be disposed to engage their property for solong a period as the Tontine of India, will have the opportunity of subscribing to the 3d Tontine expiring 30th June 1824, the Funds of which on the 30th June next, will amount to about Sa Rs-8,50 000.

In conformity to the Regulations of the First Tontice, the whole of the Funds of that Society are invested in Paulic Securities which for yielding an interest equal to that derived on the Capital of the 2d a d 3d Tentines, the magnitude of the dividend of the first mentioned Swiety, payable on the 30th June next, will not form a just ciletion by Which to estimate the result of the others.

The Funds of the 2d and 3d Tontines are chiefly loaned on mortgages of houses and landed property in Calcutta, and in secure loans to houses of business at a rate of interest greater than most individuals could obtain for their capital, and it is proposed to employ in a similar marker, the Funds of the Tontine of India, preferring on a locca-lone mortgag s when obtainable. The funds and all transactions connected with this Tontin ar to be under the controll and superintendance of Directors residing in Calcutta, as a Committee of Management, in which situation the following have accorded their assistance:—

David Clark, George Ballard, G. J. Gordon, and Wm Ainslin, and with whose concurrence the following Regulations are now published for general information.

Adverting to the probability of the Tontine in India, yielding a superior Interest on its Funds to what can be realized on Capital at either of the other Presidencies—to the extent of Subscriptions likely in consequence to be received from these Presidencies,—and to the circumstance of the accounts of the Society being kept in, as well at the final dividends made in Bengal Sicca Rupees, it has been deemed equitable to the interests of all parties, to make provision in the Regulation for the rate of Subscription at Madras and Bombay, being governed by the rate of Exchange,

Subscriptions will now be received at the Office of

## Bengal Military Fund.

The Directors of the Military Fund having received numerous enquiries respecting the Regulations of the Fund, and the terms on which the capital of the late Widow's Fund has been transferred to the Military Fund, avail themselves of the liberality of the Editors of the Calcutta Newspapers in giving gratuitous insertion to the amended Code of Regulations, which took effect from the 1st November, 1824, and also to the Resolutions adopted at a General Meeting of Members and Subscribers of the Widow's Fund, on the 18th August 1823.

The Directors at the same time notify that the Widows of Dissentients will not benefit by the increase of pensions voted on the Sth November 1824, which is restricted to Widows now on the Fund, and who came on it subsequent to the 1st January, 1809.

By Order of the Directors,

Military Fund Office, \\
15th Nov. 1824.

H. MARTINDELL, Secretary,

At a General Meeting of the Members and Subscribers of the Bengal Military Widow's Fund, held at the Bank of Hindoostan this day Monday, 18th August, 1823.

The following resolutions were proposed and unanimously agreed to.

1st. That the following Extracts from the General Letter of the Homorable Court of Directors in the Military Department, dated 26th February 1823, and forwarded with Lieutenaut Colonel Casement, C. B. Secretary to Government's Letter of the 4th ultimo, be read, viz.

### Extract Honorable Court's Letter.

Para. 12. "We now proceed to convey to you our sentiments and Orders relative to our contribution to the Mintary Widow's Fund."

13. "It appears from the statement of the Managers (Letter 30th July 1820;) that the Subscribers to the Fund have greatly decreased in number; those in the unmarried Class having almost wholly withdrawn their Subscriptions, while several of the married Officers have entered into other Toutines; notwithstanding the patronage which we have given to the Fund, and the advantage which it possesses of a large annual contribution from us."

- 14. "All the other Funds established at your Presidency to which we contribute are, as far as the provision for Widows is concerned, framed upon principles similar to those which were laid down in our Military letter of 22d February 1811; and the Military Funds at Madras and Bombay which are exclusively confined to Charitable purposes and embrace a greater variety of such objects, are supported by nearly the whole of the Officers of those Establishments."
- 15. "We are of opinion, that a Military Fund upon the General Principle of those of Madras and Bombay, is equally suitable to the Officers of your Establishment, and would be attended with equal success."
  - patch, to offer to the Subscribers of the Bengal Military Widow's Fund, the allowance of the encreased rate of Interest solicited upon their Securities, upon the condition of adopting as the basis of their Regulations, the principle of the Military Funds of Madras and Bombay, except in respect to the provision for Orphans; an object which is already adequately provided for by the Military Orphan Society of your Establishment, and the exclusion of which will justify a proportionate reduction in the rates of Subscription."
  - liberal provision for distressed Widows and Orphans, provide also for the payment of passage money for their conveyance to England, and also for passage money to and from England, and support there, for Indigent Members of the Fund, labouring under ill health, and the Military Fund at Madras has lately commenced granting Pensious to Officers having served more than 10 years in India, who have been compelled to leave the Service from ill halth, without being entitled to full pay."
  - 18. "These are previsions of advantage to the Service generally, and holding out strong inducements to subscribe to unmarried Officers on whose support the prosperity of these Funds so much depends."
  - ahould refer to the Governments of Madras and Bombay for full information in regard to the Military Funds at those Presidencies, and the principles upon which the scale of contributions has been fixed, in reference to the advantages which they respectively hold out to their Members; in order that the Managers of the Bengal Fund after making due allowance for the absence of any necessity to provide for Orphan Children, may form a correct opinion to be previously sanctioned by you, of the terms which it may be proper to offer to the present Subscribers, as the condition of transferring their Interests into the Fund thus modified, and to the Officers in our service who do not subscribe to the present Fund."
  - 20. "We shall approve or your allowing such Subscribers to the present Fund, as may dissent to the transfer of their Interest into the New Fund, to continue their Subscription under the Regulations as explained in our letter of the 22d February 1811, with respect to His Majesty's Officers, their Widows being allowed the present rates of Pension, but we are most desirous that you should endeavour to combine the two parts of the Fund by such modifications as shall give substantial security to the New Subscribers, while at the same time they improve it's condition and preserve that good faith which is due to those, who have contributed to the present Fund."
  - 21. "From this reservation in favor of the existing Subscribers to the present fund, however, must be excepted those subscribers who, under the New Regulations recently approved by you; have subscribed for a higher rate of Pension than their Widows would have been entitled to, under the former regulations in reference to the rank of their husbands in the Army. We had withhold the expression of our disapprobation of the sanction which you have given to a rule contravening entirely, the only part with

one exception, of our Instructions of 22d February 1811; which the Managers of the Military Fund at your Presidency have thought proper to act upon. Whether we view the case of these Subscribers in reference to the above considerations, or to the security of the Fund, we have no hesitation in expressing our opinion that they ought to be placed in the situation from which the new Regulations may have induced them to remove (with the exception only of the difference between their Regimental and Armyrank, hereafter adverted to;) and the amount returned to them which may have been subscribed under the Regulation in question, in excess of their former subscription."

- 22. "We admit, that the arguments used by the Managers in favor of the proposition for opening every class of Subscription to the service gamerally are correct, as applied to a Toutine supported only by the contribution of it's Members."
- 23. "Every Subscriber's Widow is, on that Supposition, likely to be mefit in proportion to the amount of the husband's Subscription, and the sooner that Subscription commences, the better for the Fund. But if the Fund be aided by Charitable Contributions, or by the contributions of the larties not deriving benefit from the Fund; the Widows of those who subscribe to the higher classes will, by obtaining a larger share of these contributions diffusion protants the shares of the inferior Classes."
- ormer instructions as to consent to your allowing Officers to Subscribe according to their Army Rank, as was requested by Captain Faithful, in his letter to the Managers dated 4th March 1820. In our instructions of 22d February 1811, we did not particularly treat of the difference established between the rates of contribution or married or unmarried Subscribers. With a view to encourage the contributions of the latter Class, we are prepared to sauction a difference of races for two Classes."
- Realitions which requires a fresh Certificate of health, for every rise of Class; a condition, which however proper when each Class of Subscription is open to every Office: attrooph remaining Stationary in Rank. Would operate with necessar hardship when applied to rise by promotion, as it would deprive the Widow of an Officer of the Pension of her Class, in case ther husband should suffer in his health, in any stage of his promotion; either from climate or the nature of the public service in which he might be engaged."
- 26. "We have lately resolved to render it obligatory upon all Civil Servants, appointed by us in future, to subscribe to the Civil Fund of their respective Presidencies; and to communicate to such of those Servants, now in India, our wish, that they may subscribe, and our determination to refuse compliance with any application for relief on the behalf of Widows or Families of such Servants as shall refuse to contribute to the Fund."
- Subscription of M litary, Medical, and Ecclesiastical Servants, appointed for the Presidencies of Madras and Bomba, to the Funds established for their respective services, and we shall be prepared to follow the same course in favor of the Bengal Military Widows' Fund, when its constitution shall have been resised upon the principles explained in this letter."
- principle of confining the operations of the Fund to cases of distress should be so far modified, as to admit of some contingent benefit to the contributors, generally, as it respects the Civil Funds of Madras and Bombay, the optional Annuities held out to a limited number of their Subscribers, will answer the purpose, although the gradations of rank in the Military Service,

preclude the adoption of an arrangement precisely similar by the Military Funds; we are of opinion, that the modification of the "eventual benefits" described in the 5th section of the Regulations of the Madras Milirary Fund, dated in October 1818, extending those, or similar, benefits to a limited number of Officers, not in ill health, may accomplish the object without interfering in any material degree, with the benevolent purposes of the Faud."

- 2d. That the present meeting having taken into consideration the recommendation and suggestions contained in the above extracts from the letter of the Honorable Court; and knowing also that it is the wish of a numerons body of the Bengal Army, that a Military Fund similar to those of Madras and Bombay should be established at this Presidency.
- 3d. That it be proposed, for the suffrages of the army at large; that a Bengal Military Fund be established, and that it be further submitted for the sanction of those concerned, that the Bengal Military Widow's Fund be incorporated therewith.
- 4th. That the following Statement of the Military Widow's Fund up to the 31st December 1822, shews the same to be in a most ratisfactory and flourishing condition, the income exceeding the Expenditure of the last year by more than 78,000 Rupees.

# Calcutta Laudable Society.

The object of the institution of the Landable Society is to provide a Fund for the Insurance of Lives, whereby Individuals may secure a Provision for their Families after their death, or Creditors may guard themselves against less in the event of the decease of their Deutors

The Landable Society differs from an Office for the Insurance of Lives, (as such Offices have been generally constituted in European Countries:) in that the whole Fund of the Society accumulate for the benefit of the Insured, and of them alone: that no Insurer reaps a profit from the Institution, and that even the charges of management are regulated on so œcountries!

It differs both from a Life Insurance Office and from most of those public associations into which certain orders of the community are frequently induced to enter for the purpose of providing a Fund for the maintenance of their Families after their death; in that it does not profess to ensure any specific sum of Money or Annuity to the representatives of the deceased, but merely their proportion of such sum as its accumulated fund shall eventually yield. This uncertainty, however is entirely in favour of the Insured, for on the one hand, by the ultimate division of the funds, he derives the atmost possible benefit which any Life Insurance could afford him without a positive loss to itself, while on the other hand he is perfectly secured against that disappointment to which the contributors to public Charitable Funds are not untrequently hable, from the total failure of a scheme founded on false or over-sanguine calculations. The Members of the Laudable Society have a certainty of benefitting to the utmost extent proportioned to their respective contributions, and neither more nor less.

The Subscriptions to the Laudable Society are portioned into certain Shares, and though the rules of the Institution do not warrant the precise sum which each Share is to yield in case of a lapse of a Life subscribed on, an approximation to that sum may be obtained from the result of former Societies. In the Fourth Laudable Society each Share on a lapsed life yielded Sa. Rs. 5516, exclusive of the regulated advance of 4,000. The present state of the Funds of the Fifth Laudable Society, now about to close, justify the expectation that the holders of Shares on lapsed lives will receive about Sa. Rs. 3,200 in addition to the prescribed advance already drawn. The difference in the productiveness of Shares in the two Societies respectively, is to be ascribed to an unusual mortality amongst the Insured. A Share in the Sixth Laudable Society may however be taken as covering the risk of Sa. Rs. 9,000.

The Sixth Laudable Society will commence on the 1st January, 1827, and close on the 31st December 1831, at midnight, and its rules will be found to agree essentially with those of the Fifth, with the exception of au Augual, instead of Quinquennial rise in the rates of Subscription.

## REGULATIONS OF THE SIXTH CALCUITA LAUDABLE SOCIETY:

ARTICLE 1. The object of this association is to provide a fund for the Insurance of Lives. This fund is to be portioned into Shares; and an incividual may subscribe for a certain number of Shares, either on his or her own life, or on the lite of any other individual. In the former case, the general estate of the deceased, or such person or persons as he or she may by will or assignment have appointed, shall benefit in the event of a lapse; in the latter, the person who may have subscribed on the life of the deceased, shall benefit to the extent of the shares subscribed for; unless, in either case, such shares be especially declared at the time of subscription to be for the benefit of any other person or persons, or be subsequently made over according to the form hereafter prescribed, for the benefit of any other person or persons, in which case such person or persons, shall be entitled to benefit in the event of a lapse, and no other.

### CALCUTTA

# Supplementary Laudable Society.

The considerations which led to the establishment of a series of Supplementary Landable Societies, were these. By the consultation of the original Laudable Societies, the major part of their funds, instead of being portioned out as the lapse's occurred to the parties entitled to benefit thereby, were left to accumulate for a series of years at a low rate of interest in Government Securities. This arrangement was specially inconvenient to those who had recourse to those Societies for effecting Insurance on the lives of their debrors, as in most cases the debis which the Insurances were intended to cover, continued to increase at a rate of Interest greatly excoeding that at which the funds of the Society improved. Experience also proved, that notwithstanding the scale of the original Landable Societies had been so far enlarged as to admit of the subscription for ten shares on a single life, the augmentation was not in all instances sufficient for the purposes of the public, nor commensurate with the general and daily increasing extension of Money transaction.

The leading principles of the Supplementary Landable Societies may be thus briefly enumerated. The duration of each Supplementary Society is for one year only—at the expiration or this time, the funds of the Institution are divided among the holders of Shares on lapsed lives, with such reservation and according to such rules as may be in force for the time being: The holders of shares on surviving lives have the option of transferring the same to a new Society of similar duration, without renewed warranty of health.

In the early Supplementary Landable Societies Sa, Rs. 10,000, was fixed on as the maximum, to be received from the funds by the holders of a share on a lapsed life. The surplus funds were directed to be appropriated under certain provisions to the ensuing Society, and the holders of shares in preceding Societies whose dividends had not equalled the sum of Sa. Rs. 10.000. This sum in the Ninth Supplementary Laudable Society is still continued as the maximum of dividend receivable on a share held on a lapsed life; but the surplus funds are to be exclusively appropriated to the ensuing Society.

When the sum of Sa. Rs. 10,000 was fixed as the maximum of dividend to be received on one share, the interest of money was high. That sum was then proportionate to the scale of Premia and its selection justified by experience. In later years, owing to the depreciation of money, the funds of none of the Supplementary Societies have yielded so high a dividend as Sa. Rs. 10,000 on a share on a lapsed life. Judging from the results of late years, 18,000 may be assumed as the probable amount which, including the regulated advance, will be forthcoming to the holder of such share. These observations have been thought proper for the purpose of checking fallacious expectations which the Insured might be apt to entertain by observing the sum of Sa. Rs. 10,000 restricted as the maximum of dividend acceptable by the holder of a share on a lapsed life.
